## Product Description

### High Transparent Yellow Resistant HS Clear Coat Varnish High Solid Car Paint Scratch Resistant

#### Product Description:

Clear coat

Car varnishes come in two main types: two-component high solids (HS) and medium solids (MS), as well as fluid (aerosol) varnish. Two-component HS varnish is a "solid" mixture of volatile and non-volatile substances, consisting of varnish (50-70%), hardener (20-40%), and solvent (10-15%). Two-component MS varnish is of medium hardness, with a higher proportion of solvent (30-50%) and a smaller amount of varnish (35-45%). It dries quickly and is highly resistant to scratching, but requires at least two coats for optimal results.
