Total:100g			
Recipe weight:100g			

product description

Toyota 040 Super White is a popular car paint color used by Toyota on many of its vehicles. It is a bright, pure white color that has a slightly blue undertone, giving it a cool and crisp appearance.

The 040 Super White color was first introduced by Toyota in the late 1990s and has since become a signature color for the brand. It is a highly sought-after color among Toyota enthusiasts and is often seen on popular models such as the Corolla, Camry, and RAV4.

The Super White color is achieved through a special paint process that uses multiple layers of paint and a clear coat to give the car a glossy and durable finish. The paint is applied using a spray gun and the car is baked in an oven to ensure the paint adheres properly.

Overall, the Toyota 040 Super White color is a classic and timeless choice for those looking for a clean and modern look for their vehicle.
