1K pure black car paint primer is a deep black paint made by adding black paint to the colorless mother-of-pearl (baked oil black). It has the following main features:

1. The color is extremely deep: it can reach pure pure black, which is very close to the color of a black hole.
2. Low gloss: In order to emphasize the deep tone of pure black car paint, the gloss is generally reduced.
3. Strong opacity: 1K pure black car paint primer has strong opacity, and basically no other colors will be transmitted.
4. Easy to cover surface defects: dark black tone is easy to cover surface defects such as scratches and stains, and has a covering effect.
5. Average anti-rust performance: Since 1K pure black car paint mainly pursues the color tone effect, the anti-rust performance is slightly worse than that of general car paint.
6. It is easy to peel off after baking: 1K pure black car paint does not contain plastic components, and it is easy to peel off the skin glue after baking.
