

Nitro Matte Black Car Paint Basecoat High Quality Supply Manufacturer

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: C-5005
- Minimum Order Quantity: 200L
- Price: 2.90/LUSD-4.16USD/L
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

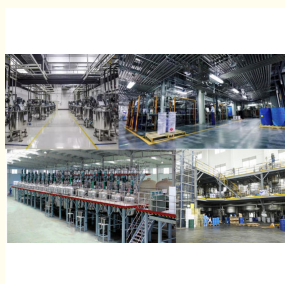

Product Specification

- Brand: CarCharm
- Name: Nitro Matte Black
- Net Weigh: 0.95KG
- Specification: 1Lx12
- Color: Black
- Dry Time: 2 Hours
- Finish: Matt
- Number Of Coats: 2-3
- VOC: Less Than 50 G/L
- Highlight: **Matte Black Car Paint Basecoat, 2k basecoat paint, auto base paint**

Product Description

Nitro Matte Black Car Paint Basecoat High Quality Supply Manufacturer

Manufacturer introduction:

Guangzhou Meklon Chemical Technology Co., Ltd. was established in 2014 and has developed a comprehensive and scientific production chain. We specialize in manufacturing a wide range of products including automotive paints, industrial paints, putty, clear coat, hardener special curing agents for automotive paints, and automotive care products. Additionally, we also produce special unsaturated resin, various cans, and cartons.

Our company has a strong global presence, with our sales network covering over 65 countries. In China alone, we have more than 1,500 customers. We have established solid business relationships with renowned automobile manufacturers, shipbuilding companies, and machinery manufacturers. Over the years, our products have gained recognition and preference from customers both domestically and internationally.

product details

Product name:	P-5005 Nitro Matte Black	Net Weight:	0.95/3.6/4.6KG
Specifications:	1L/4L/5L	Raw material:	pigment
Hiding power:	Strenght	Storage conditions:	Dry, ventilated, cool place, away from fire and high temperature environment.
shelf life:	1-3 years, avoid long-term storage, it is generally recommended to use it within one year.	Gloss:	matte non-reflective
maintenance:	Easy and simple	construction:	1K Matte Black Mixed Thinner 1:1 Stir and spray directly

1. Product Overview

As a professional car paint manufacturer, we are proud to launch this high-quality matte black car paint. With its unique texture and excellent performance, it has become a popular choice for car wholesalers and auto repair shops, and is deeply loved by customers.

2. Product Features

Appearance effect: Matte black presents a low-key and mysterious temperament, giving the vehicle a unique personality charm. Compared with traditional glossy paint, matte black reduces reflections and shows a more calm and restrained style.

Quality: We strictly control product quality to ensure that every drop of matte black car paint meets high standards. The use of high-quality raw materials and advanced production processes, as well as professional engineers testing every link, make this paint have excellent durability and stability.

Price: Despite the high quality, we are committed to providing customers with competitive prices. By optimizing production processes and cost control, we are able to provide high-quality matte black car paint at an affordable price, allowing more customers to enjoy high-quality products.

Durability: This car paint has excellent durability and can resist various wear and erosion in daily use. Whether it is exposed to wind and sun, rain and snow, or the impact of sand and stones on the road, matte black car paint can maintain its good appearance and performance.

Spraying effect: The professional formula design makes matte black car paint perform well during the spraying process. It can evenly cover the surface of the car body to form a smooth and flawless coating. Whether it is large-area spraying or local repair, it can achieve the ideal effect.

Leveling: Good leveling ensures that the paint liquid can quickly level after spraying, reducing the appearance of flow marks and orange peel. This makes the construction process smoother, improves work efficiency, and also ensures the final paint quality.

Easy to spray: Our matte black car paint is easy to operate, even for people without rich spraying experience. Its spraying parameters are easy to master, can dry quickly, and save construction time.

Global sales: Due to its excellent quality and good reputation, our matte black car paint is sold all over the world. No matter which country or region you are in, you can easily get our products to provide high-quality protection and decoration for your car.

3. Scope of application

This matte black car paint is suitable for all types of cars, including sedans, SUVs, trucks, etc. Whether it is a new car painting or an old car renovation, it can bring a brand new look and protection to your vehicle.

4. Customer feedback

Our matte black car paint has been highly praised by car wholesalers and auto repair shops, and their customers have also praised the effect of this paint. Here are some customer feedback:

"This matte black car paint is of very good quality and reasonable price. The effect after spraying is great, and the leveling and easy spraying make our work easier. Our customers are also very satisfied with this color and will continue to choose your products in the future."

"I have been looking for a durable and affordable car paint, and finally found your matte black. Its performance exceeded my expectations. Not only is the color beautiful, but it also stays in good condition in various environments. Highly recommended to other auto repair shops and car owners."

5. Operation process:

1. Surface preparation

Clean the car surface thoroughly to remove dirt, grease, rust and old paint.

Use sandpaper to polish the surface to increase the adhesion of the new paint.

Protect the areas that do not need to be painted with masking materials.

2. Mixing paint

According to the proportions specified in the paint product instructions, mix the paint, hardener and thinner accurately. Stir well to ensure that the paint components are fully integrated.

3. Spray gun settings

Choose a spray gun suitable for car paint. Gravity spray guns are usually recommended.

Adjust the air pressure, paint output and spray shape of the spray gun.

4. Spraying skills

Keep the spray gun perpendicular to the car surface at a distance of about 15-20 cm.

Use a zigzag or overlapping spraying method. Each spray should cover 50%-60% of the previous one.

Start spraying from more hidden areas, such as the inside of the door and the inside of the hood.

Gradually expand outward and finally spray the conspicuous areas.

5. Multi-layer spraying

Multi-layer spraying is usually required, and appropriate drying time should be allowed between each layer.

The first layer is sprayed thinly, called "mist spraying", to increase adhesion. Subsequent layers are gradually thickened until the desired color and gloss are achieved.

6. Drying and curing

Allow the sprayed car paint to dry naturally in a well-ventilated environment. Depending on the type of paint and ambient temperature, the drying time may vary. Some paints may require heat curing to enhance performance.

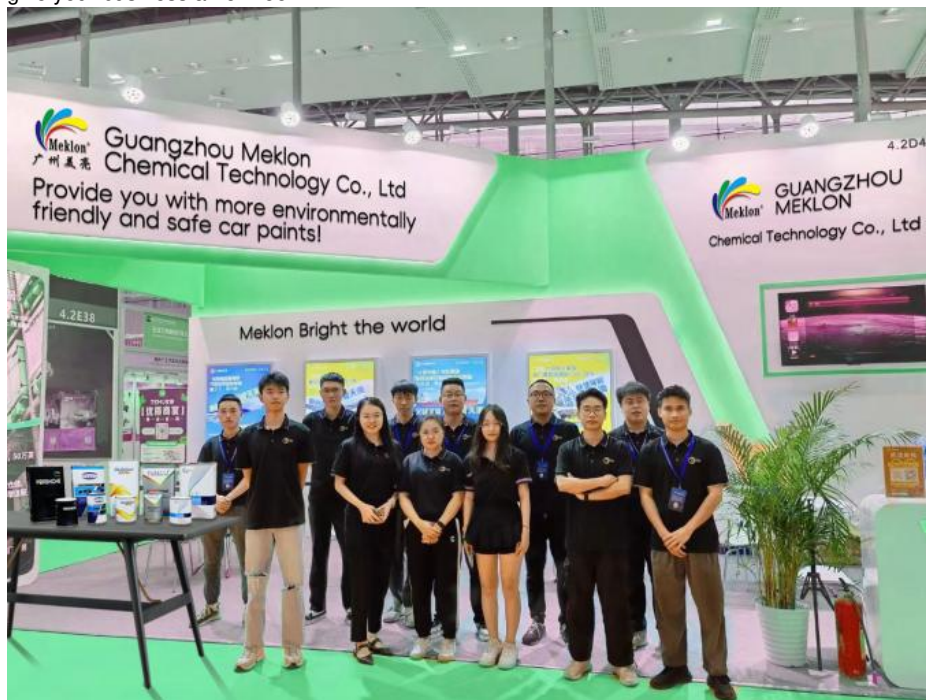

7. Inspection and finishing

After the paint is dry, check the surface for defects such as sagging, orange peel, particles, etc. If necessary, lightly sand with sandpaper and re-spray finishing.

6. Summary

As a car paint manufacturer, we are committed to providing customers with high-quality and affordable products. Our matte black car paint has become the first choice of car wholesalers and auto repair shops for its unique appearance, excellent quality, good durability and easy spraying. If you are looking for a high-quality automotive paint supplier, choose Meklon and give your business a new look.
