Product Description

Good Adhesion and Coverage High Glossy 2K Blue phase Special Black Car Refinish Paint

Product Description

Our company has developed the Addition brand to meet the diverse needs of our customers. This highly concentrated universal tinter series, HS series, can be mixed with different binders to create 2K tinters, 1K tinters, 1K silver paint tinters, and 1K pearl paint tinters. With over 70 types of HS tinters, including HS solid color tinters, HS silver tinters, and HS tinters, we offer a complete range of colors with excellent stability, compatibility, and covering power at a low price. Our Addition HS car paint series is a DuPont Central series replacement, and our HS tinters can be used with DuPont's ready mixed paint formula system.

Our MS car paint series offers a bi-component car refinish paint system, providing a high-quality single coat with fast drying, high hardness, high gloss, bright color, and excellent covering power. It can be cured under room temperature or through low-temperature baking with a mixing ratio of 2K Tinters: Hardener: Thinner = 2: 1: 0.2-0.5 (volume ratio). At 20 °C, it has an applicable period of about 3 hours and a drying time of 40 minutes for surface dry and 12 hours for thorough dry. With 60 °C baking, it can be thoroughly dried in 40 minutes. It is available in packages of 1L *12, 1L *6, and 4L *4, with a storage period of more than 18 months at 20 °C when stored in its original sealed package.

1K Tinters

Features: It is a high quality base coat series, two coats and three coats system. Silver, pearl or solid color tinters are included. Excellent covering power, metallic effect, easy spraying.

Our 1K Tinters series is a high-quality base coat system that includes silver, pearl, or solid color tinters. With excellent covering power, metallic effect, and easy spraying, it offers a two-coat or three-coat system. The recommended mixing ratio is 1:1-1.2 (volume ratio) for 1K Tinters to thinner.

For spraying, apply two to three wet layers, with a flash-off time of 5-15 minutes between layers. It is available in packages of 1L *12, 1L *6, and 4L *4, with a storage period of more than 18 months at 20 °C when stored in its original sealed package. If spraying a large area, we recommend adding 5% hardener before spraying the varnish.

To apply, we recommend using a spray gun with a nozzle size of 1.2-1.4mm (gravity spray gun) or 1.3-1.5mm (suction spray gun). The recommended spraying pressure is 3-4 Bar, with a spraying viscosity of 13~18s Ford Cup #4 at 20°C). The recommended number of coats is a maximum of three coats, with a thickness of 40-60μm and a flash time of 5-10 minutes between coats.

Why Choose Us

Our Products	Our main product is car refinish paint, we also can provide different kinds of car care accessories, like the spray gun, tack cloth, sanding paper, undercoating, mixer, mixing machine, paint cup, etc.
Quality	From the raw materials to the ready products, we always control the quality strictly.
Service	We provide OEM/ODM service, if you want the products to be your own brand, please feel free to contact us!
Fast Delivery	We guarantee to deliver/ship the goods within 7 to 10 days after the order confirmed.
