Product Description

Auto Repair Paint Low VOC Pearl Crystal Yellow Car Paint UV Resistant Supplier

Meklon Introduction:

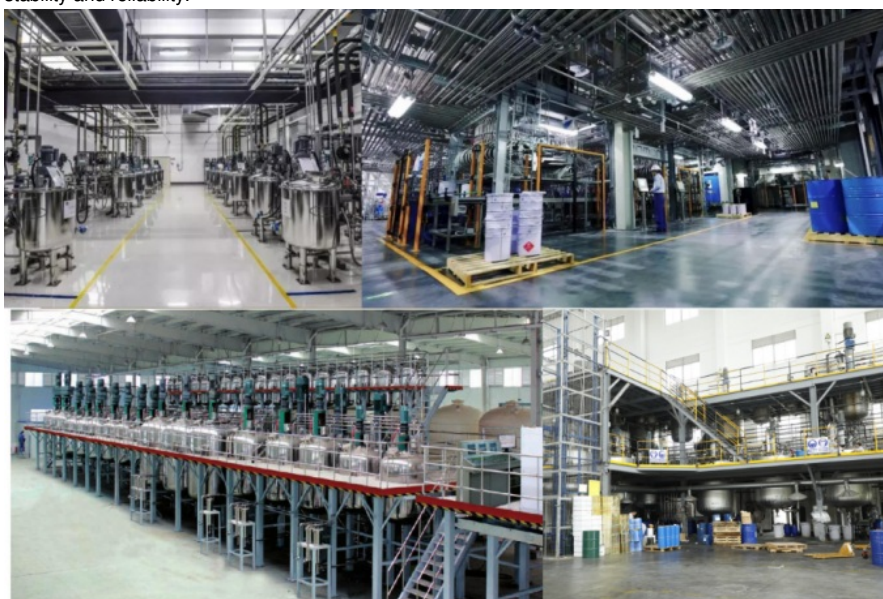

Meklon is an automotive paint manufacturer located in Guangzhou. It is committed to producing automotive 1K primer, 2K topcoat, thinner, hardener, clear coat, varnish, putty, body filler and other products needed for automotive beauty. It has been deeply involved in this field for 20 years and has accumulated rich experience and excellent technology.

Our factory covers an area of 3,000 square meters with advanced facilities and reasonable layout.

The production workshop is equipped with advanced and efficient equipment. The warehouse is well-equipped and has excellent storage conditions. We pay great attention to environmental protection and hygiene. The entire factory environment is clean and tidy, meets environmental protection standards, and is committed to achieving green production.

We are extremely strict in controlling product quality. Each product must undergo multiple quality tests to ensure its excellent performance, stability and reliability.

Product description:

Model NO	C-X03 Crystal Yellow Pearl	Certification	ISO/Ts 16949:2009
Substrate	Steel	Components	Multiple ingredients
Formation Mechanism	Conversion Type	Application Method	Spray
Usage	Car Paint	Market	Global

Delivery	By sea	Shelf Life	1-3Years
Certificate	ISO,MSDS,SGS	State	Liquid Coating
Transport Package	Can/Carton	Specification	0.5L/,1L, / 4L, 5L
Trademark	Meklon	Origin	Guangzhou, China

Crystal Yellow Pearl car paint is a very popular car paint that is loved by dealers.

The storage conditions of this car paint are: ventilation, dry, around 25 degrees Celsius, and light-shielded.

Crystal Yellow Pearl is a medium-sized crystal yellow pearl with strong flash and strong color changes. The front is golden yellow and the side is blue-white.

In terms of quality, the paint has a shelf life of 1-5 years. The effect of use is extremely weather-resistant. Some auto repair shops have reported that their customers can even use it for more than 10 years. Meklon's Crystal Yellow Pearl touch-up paint generally has good durability and corrosion resistance.

Meklon has improved the hiding power and smoothness of Crystal Yellow Pearl by optimizing the particle size distribution of Crystal Yellow Pearl. Smaller particles can make the pigment more evenly distributed on the substrate, thereby improving hiding power. At the same time, a more uniform particle size distribution can reduce the fluidity of the pigment, thereby improving its smoothness.

Adding other pigments or additives to the formula may help improve the hiding power and other properties of Crystal Yellow Pearl. For example, adding an appropriate amount of white pigment can improve the hiding power of the pigment, and adding a leveling agent can improve its smoothness.

The performance of Crystal Bronze Pearl can be maximized by optimizing the application process of the paint. For example, using the right paint brush or nozzle can ensure that the paint is applied evenly, thereby improving hiding power and smoothness.

Meklon's automotive refinish paint is popular among traders around the world. It has good product quality, affordable price, long shelf life, good service, a professional team, a large company scale, and supports customized cans and cartons.

Choose Meklon automotive paint manufacturer, long-term cooperation, more and more business, let us develop the automotive paint business together!

Product advantages:

Crystal Yellow Pearl Good Coverage Crystal Yellow Pearl has excellent coverage and gives good coverage on light bases.

Crystal Yellow Pearl has a high gloss and Crystal Bronze Pearl has a high metallic luster, which allows the pigment to show beautiful visual effects under different light. This high gloss allows the pigment to stand out in a variety of applications and is a feature that customers love.

Crystal Yellow Pearl has good durability, and Crystal Bronze Pearl has good light fastness and durability, and can maintain stable color and gloss under different environments. This durability allows customers to choose to use Crystal Bronze Pearl pigments with confidence that they will maintain their beautiful appearance over time.

Meklon is essential for the quality control of the production of Crystal yellow Pearl. Ensuring the particle size distribution and formulation accuracy of pigments ensures consistent performance from batch to batch, improving hiding power and other properties. Our engineers can also customize according to customer's requirements. This can help meet the different needs of different customers to be successful in different markets.

	Surface Cleaning: Use a Degreasing Cleaner to Remove Wax, Oil, and Other Impurities.
	The Mixing Ratio (Volume Ratio)
	
	Spray Viscosity: 14-16 Seconds(23°C, coating-4 cups)
	Recommended Spray Tool and Air Pressure:
	RP Spray Gun: Caliber: 1.3mm Air Pressure: 2.0-2.5 (bar)
	HVLP Spray Gun: Caliber: 1.3mm Air Pressure: 1.8-2.0 (bar)
	Number of Spray Layers/Film Thickness: 2-3Level,15-25um
	Flash Time: At 23°C, Flash Dry Between Layers for 5-10 Minutes
	Rest Time: After 10-15 Minutes, Spray the Clear Coat

Customer feedback:

"I run an auto repair shop and have been looking for a high-quality and stable auto paint. Since using your product, it has really solved my big problem! Your auto paint has accurate color and strong covering power. Whether it is a small area repair or a full car spray, the effect is perfect. And it has excellent weather resistance. After customers use it for a long time, the paint surface is still bright and beautiful. Thank you very much for providing such an excellent product!"

"As a car modification enthusiast, the requirements for paint are quite high. After trying your car paint, I am so satisfied! The color is rich and unique , especially the metallic paint, which instantly upgraded my car to a higher level. During the construction process, the paint has good leveling and dries quickly, which greatly shortens the modification time. I highly recommend it to other friends who modify their cars! "

"We are a large car beauty chain store. After cooperating with you, customer satisfaction has been greatly improved. Your car paint is of high quality. Not only is the color full and lasting, but it is also hard and wear-resistant, and can withstand various daily wear and tear. At the same time, your after-sales service is also very thoughtful, so we have no worries during use. We will continue to cooperate with you! "

storehouse:

Automotive paint has high requirements for storage conditions, so our warehouse is equipped with a constant temperature and humidity control system. This helps maintain the stability and quality of the paint and prevents it from getting wet, clumping or deteriorating.

Due to the chemical content of automotive paint, warehouses must take necessary safety measures. Including fire alarm systems, fire extinguishing equipment, ventilation systems and explosion-proof equipment to ensure the safety of the warehouse.

To effectively manage automotive paint inventory, warehouses often use inventory management systems. These systems can track inventory levels, colors and types and provide real-time inventory information for timely replenishment and dispensing of paint.

Automotive paint warehouses are equipped with quality control procedures and equipment to conduct quality checks on incoming goods. This helps ensure that the quality of the paint is up to standard and reduces the risk of poor repairs or painting results due to quality issues.

In the automotive paint warehouse, our employees must follow specific safety operating procedures. This includes wearing personal protective

equipment (e.g., gloves, goggles, masks) and proper handling and storage of paint to prevent accidents and chemical exposure.

Our automotive paint warehouse adheres to environmental laws and regulations to ensure the safe handling and disposal of waste paint, containers and other chemical waste. Including waste classification, garbage disposal procedures and environmental monitoring.
