2K yellow-green color is usually a bright and vivid color with some transparency. It is obtained by mixing yellow and green pigments, and different ratios will produce different shades of color. Yellow-green is usually a more lively and energetic color, and is often used for painting or decoration of cars, bicycles, decorations and other items.

The 2K chartreuse color can also be described as a bright lime or grass green with distinct yellow and green undertones. It may convey a feeling of freshness, vitality, health, etc., and is often used in the design of outdoor or sports-related products.

Why Us:

We are the leading professional manufacturer of automotive refinish paints in China, offering strict quality control and consistently high product performance. Our brand image is highly regarded, and we are recognized as a China-famous influential and innovative brand in the car paint industry. With an advanced color mixing system and an excellent customer service system, we have achieved up to 30% annual growth in the overseas market.
