Brand:PROSHICHE	Usage:Appliance Paint, Boat Paint, Car Paint
Place of Origin:GuangZhou China	Specification:1L/2.5L/4L/5L

Fine White Silver Silver Powder Paint is a high quality, high performance, environmentally friendly product that can provide suitable car paint for car manufacturers and repair shops, our company is committed to technological innovation and product development to ensure that our customers always receive the best service and support

Construction method:

Preparation

Before starting your paint job, have your tools and materials ready, including:

- 1.paint gun or brush
- 2.car surface cleaner
- 3.Masks and Gloves
- 4.Fine White Silver silver powder paint and thinner (if needed)
- 5.Wash the surface of the car to ensure that there are no impurities such as dirt or grease on the surface.
- 6.Spray Fine White Silver silver powder paint

Fine White Silver can be applied with an airbrush or brush. Before starting, please thin the Fine White Silver silver powder paint according to the ratio in the product specification to ensure the best results and painting experience.

Paint Gun: Pour Fine White Silver paint into a paint gun and use the appropriate nozzle to achieve the desired spray effect. When painting automotive surfaces, use even side-to-side and up-and-down motions to ensure an even coat of paint.

Brush: Pour Fine White Silver paint into a container and use a brush to apply to the surface of the car. When applying, use an even brush and an up and down motion to ensure an even coat of paint.

Drying and spraying of clear varnish

Fine White Silver silver powder paint needs to be completely dry after painting, usually it takes about 24 hours. When you're done, you can spray it with a clear coat for added protection and gloss to the finish.

Please note to follow proper safety precautions when applying Fine White Silver, including wearing personal protective equipment such as face shields and gloves. If you are new to painting jobs, consider having a professional painter do it for you.
