## Product Description

### 1K Auto Paint Refinish Coating Crystal Pearl Color Primer Crystal white Car Paint

#### Product Description

X-01 Crystal White Pearl is a high-end automotive coating with the following characteristics and advantages:

**Pearl Gloss:** The color of X-01 crystal white pearl is a mixture of various pigments and special pearl powder, which can present a unique pearl luster and create a three-dimensional and layered feeling on the vehicle surface.

**Weathering resistance:** X-01 crystal white pearl coating has excellent weather resistance and can resist the erosion of harsh environments such as UV, oxidation, and acid rain, maintaining a long-lasting aesthetic effect.

**Easy to apply:** The construction process of X-01 crystal white pearl coating is simple, easy to get started, and can be completed in a short time, improving work efficiency.

**4. Vivid color:** The X-01 crystal white pearl coating has a bright and vibrant color with good color saturation, which can attract people's attention and improve the visual effect of the vehicle.

**Comfortable texture:** The surface of X-01 crystal white pearl coating is smooth and delicate, with a comfortable feel, which can enhance the grade and taste of the vehicle.

**Scratch resistance:** X-01 crystal white pearl coating has good scratch resistance, which can effectively prevent scratches and wear on the surface of the car body and maintain its aesthetics.

In summary, X-01 crystal white pearl coating has unique colors and textures, which can enhance the appearance and quality of vehicles, and has good durability and protective performance. It is a high-end automotive coating.

#### Construction technology of 1K solid color basecoat

##### 1K Solid Color Basecoat

The construction process of X-01 crystal white pearl coating is as follows:

**Body preparation:** Before construction, the body needs to be cleaned, polished, degreased, and rust removed to ensure that the surface of the body is clean, flat, and smooth.

**Primer coating:** Spray primer on the surface of the vehicle body to form a protective layer, increasing the adhesion and durability of the coating.

**Intermediate coating:** Mix X-01 crystal white pearl coating and diluent according to the specified ratio and spray it on the vehicle surface to form a layer of intermediate coating. Pay attention to mastering the thickness and uniformity of spraying.

**Top coat coating:** After the middle coat is dry, spray the top coat with X-01 crystal white pearl coating. It is also necessary to pay attention to the thickness and uniformity of the spraying.

**Drying:** After the topcoat has dried, it is necessary to dry the vehicle body to accelerate the drying of the coating and improve its adhesion and hardness.

**Manual grinding and polishing:** After the coating is completely dry, it is necessary to manually grind and polish the coating to eliminate surface defects and improve the glossiness of the coating.

**Wax maintenance:** After grinding and polishing, it is necessary to apply wax to the vehicle body to protect the coating and improve the glossiness of the vehicle body.
