

UV Proof Painting Metallic Automotive Paint Multifunctional Practical

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: P-418
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

P-418 Golden Silver

Product Specification

- Brand: PORSHICHE
- Name: Golden Silver
- Net Weight: 0.95KG
- Color: Golden
- Coverage: 10-12 Sq. Ft. Per Quart
- Dry Time: 2-3 Hours
- Finish: Metallic
- Indoor/Outdoor: Indoor And Outdoor
- Mildew Resistant: Yes
- Number Of Coats: 2-3 Coats
- Recoat Time: 2-4 Hours
- Sheen: Semi-gloss
- Highlight: silver car paint, cheap auto body paint, metallic auto paint

Product Description

Gold and silver powder car paint is a special effect car coating color with the following characteristics:

Shining effect: Gold and silver powder car paint produces a bright shining effect when exposed to sunlight or light. The reflective ability of metal particles or sequins gives the paint a sparkling appearance, bringing a unique visual effect to the car.

High glossiness: Gold and silver powder car paint usually has excellent glossiness, making the appearance of the car more vivid and attractive. The gloss of the paint surface can enhance the depth and layering of the vehicle body.

Pearl feeling: Gold and silver powder car paint may contain small metal particles or sequins, giving the paint a pearl like luster and color changes. Under different angles and lighting conditions, the paint surface will exhibit subtle changes, adding to the visual appeal of the car.

Uniqueness: Gold and silver powder car paint brings a unique appearance effect to the car, making it stand out on the road. This special effect of paint can enhance the personality and uniqueness of the car, attracting the attention of others.

High quality effect: High quality gold and silver powder car paint can provide long-lasting color and gloss effects. It usually has good durability and can resist the effects of daily climate change, ultraviolet radiation, and dirt.

The durability of gold and silver powder automotive paint can vary depending on different brands, quality, and painting techniques. However, generally speaking, gold and silver powder automotive paint has relatively good durability, especially under proper maintenance and upkeep.

The following are some factors that affect the durability of gold and silver powder automotive paint:

Coating quality: High quality gold and silver powder automotive paint coating Meklon usually uses advanced coating technology. These coatings have better weather resistance, wear resistance, and chemical resistance, which can better protect the surface of the vehicle.

Vehicle usage environment: The durability of gold and silver powder automotive paint is also affected by the vehicle usage environment. Bad weather conditions, strong ultraviolet radiation, exposure to chemicals (such as acid rain, salt, etc.), and frequent car washing and cleaning may damage the paint.

Correct maintenance and upkeep: Regular maintenance and correct upkeep are the key to ensuring the durability of gold and silver powder automotive paint. This includes regular car washing, paint care, using suitable cleaning agents and tools, avoiding scratches and collisions, etc. Regular waxing and sealing can also provide an additional protective layer.

Gold and silver powder car paint has good durability under appropriate maintenance. However, each car owner should choose high-quality Meklon paint coatings based on their specific situation and needs, and regularly maintain them to ensure the durability and aesthetics of the paint surface.
