### Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: P-4000A
- Minimum Order Quantity: 200Boxes
- Price: 2.73USD-5.56USD
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500 boxes per day

### Product Specification

- Brand: PORSHICHE
- Name: Universal Silver Powder
- Net Weight: 0.95KG
- Cleanup: Soap And Water
- Color: Silver
- Coverage: 400 Sq. Ft/gal
- Number Of Coats: 2-3
- Recoat Time: 2-4 Hours
- Time To Complete: 24 Hours
- VOC Level: Low
- Highlight: **base coat paint automotive,  
automotive base paint, automotive 2 pack paint**

## Product Description

### P-4000A Diamond Silver Product Description:

Diamond is a silver series automotive paint with a bright and lustrous silver look. It can show a refined and high-textured effect, bringing a sense of elegance and modernity to the car.

Diamond is usually a metallic luster paint finish, which will reflect a unique metallic luster in sunlight or light. This metallic sheen adds to the car's visual appeal and adds a touch of luxury to the overall look.

Diamond typically employs a multi-layer painting process that includes a base coat, base coat and clear coat. This multi-level painting effect makes the masonry silver have richer color depth and layering, so that the car presents different visual effects under different angles and lights.

Diamond is a neutral color, neither too bright nor too dull, and has a certain balance. This makes it suitable for a variety of different types and styles of cars, whether it is a luxury sedan

### Advantages:

Meklon's automotive paints have good flow and application properties, making them easy to apply to a variety of different surfaces and shapes. Whether it's the body of a car, its components or other surfaces, Meklon's paint finish can be applied with ease, resulting in an even and blemish-free finish.

Meklon's automotive paints have fast drying properties that can significantly increase production efficiency. This means the coating hardens and cures quickly, reducing waiting times during the painting process and helping to speed up vehicle production cycles

In addition to automotive paints, Meklon also offers complementary products such as primers, clearcoats, fillers and refinishing products. These products can provide a more comprehensive coating solution to ensure the quality and durability of the coating.

Meklon's automotive paints meet the requirements of workshop operations with low volatile organic compound (VOC) content and low odor properties. This not only contributes to a good working environment, but also complies with environmental protection and health and safety standards

During the use of the car, scratches, knocks or other damage may occur. Meklon's car paint has good repair properties and makes repair work easier. Whether it's a partial restoration or a complete vehicle repaint, Meklon's paint finish blends seamlessly with the existing coating to restore the car's original appearance.

As an enterprise with nearly 20 years of experience in the automotive paint manufacturing industry, Meklon has accumulated some successful cases and customer feedback.
