Dry Red Pearl	309	0.93	100
Total:100g			
Recipe weight:100g			

#### Product Description:

Ruby Blue is a deep and gorgeous car paint color, usually showing a brilliant blue-green hue, similar to the color of gemstones, Ruby Blue may show different blue-green hues under different light, from green to dark blue , Gem blue usually has high saturation and bright colors, giving people a strong visual impact.

When refinishing jewel blue car paint, it is recommended to use a refinish product that matches the original car paint to ensure that the repaired coating is the same color as the original car paint.

Features of Meklon BMW Gemstone Blue Car Refinish Paint:

As a car manufacturer, Meklon focuses on the quality and sophistication of the car's exterior. Its automotive paint colors are often carefully designed and formulated to provide a high-quality finish with excellent color saturation and gloss.

Meklon's BMW car paint colors are rigorously tested and validated to ensure their durability and scratch resistance. This means that the repaired coating will maintain its color stability and appearance in good condition for a long time.

Meklon's BMW car paint colors generally use special formulas and technologies to ensure a high degree of color matching between the repaired paint surface and the original car paint. This allows the patched area to harmonize with the rest of the body, reducing chromatic aberrations or noticeable color differences.
