

Durable 2K Car Paint Thinner Harmless Multifunctional Transparent

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: P-602
- Minimum Order Quantity: 200Boxes
- Price: 1.64USD-2.31USD
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500 boxes per day

Product Specification

- Brand: Faralli
- Code: F-602
- Name: Universal Thinner
- Color: Transparent
- Dry Time: Fast/Standard/Slow
- Flash Point: 25°C
- Type: Liquid
- Net Weight: 0.9KG
- Highlight: Durable Car Paint Thinner, Car Paint Thinner Harmless, good automotive primer

Product Description

2K Slow Drying Thinner Auto Body Repair Paint Car Paint Spray Coating Thinner

Product Description:

For the price-conscious market, F-602 Universal Thinner offers low to medium quality at a very reasonable price. The properties and functionality of F-602 Universal Thinner are as follows:

Numerous uses: F-602 Universal Thinner is appropriate for a wide range of vehicle paints, including single coats and double coats, among others. It successfully thins the paint, making application simpler.

Effective Thinning: F-602 Universal Thinner thins paint efficiently, facilitating application while preserving paint performance and quality.

The F-602 Universal Thinner is nonetheless of adequate quality for usage in price-sensitive markets, while being categorized as a low-to-medium quality product.

Affordability: The F-602 Universal Thinner has a very reasonable price and a strong cost-performance ratio, making it ideal for markets with strict budget constraints.

A thinner with a broad application range, good thinning performance, and quick drying is F-602 Universal Thinner. Although the product is of low to medium grade, it nevertheless satisfies the standards in terms of quality, and the price is extremely reasonable. Additionally, the price/performance ratio is relatively high, making it appropriate for markets with higher pricing needs.

Usage	Reduce the application viscosity, increase the smoothness and gloss of paint film, Good solubility.	
	Fast Drying THinner	Fast drying thinner with very fast evaporation speed, suitable for spot repair or application below 15°C.
Characteristic	Standard drying thinner	Standard drying thinner, with medium evaporation speed, suitable for spot repair or application at 15-30°C.
	Slow drying thinner	Slow drying thinner, with slow evaporation speed, suitable for spot repair or overall refinishing, application above 30°C.
Note	If the temperature or humidity are too high, 10 -30% Retarder Solvent can be added.	
Shelf Life	2 years in original sealed can, cool and dry place at 20°C.	
Package	4L×6 or 2L×12 or 0.5L×15 or 1L×15	

Instructions: Thinner and one thousandth of a color of paint should be mixed equally before being sprayed.

Precautions:

1. Safety concerns should be taken into consideration when using automobile paint thinner. Paint thinners for automobiles are hazardous and flammable commodities. To reduce the risk of burning, they must be kept in a warehouse with good air flow, a comfortable temperature, and isolating fire and heat sources.
2. The automobile paint must be thoroughly swirled after the thinner has been added in order for it to reach a sufficient working viscosity.
3. Because the diluent contains harmful substances and smells strongly, make sure to work in a well-ventilated area.
4. Avoid acidic substances because they can react chemically with one another.
5. Mixing different diluents together might lead to hazardous chemical reactions and, in the worst situations, explosions.
6. Keep thinner away from combustible objects as it is a volatile material.
7. Wash your hands right away after using them to avoid leaving a stench behind and harming your skin.
