Product Description

Manufacturer Introduction:

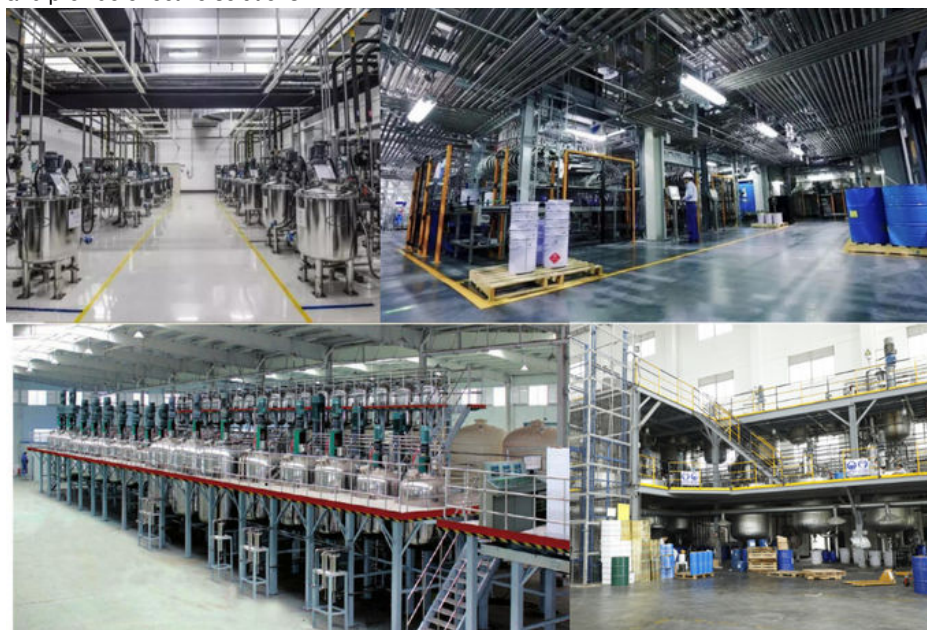

Meklon, located in Guangzhou, China, is a manufacturer with an excellent reputation in the field of automotive paint. We have a large factory covering an area of about 3,000 square meters, which provides ample space and advanced facilities for the production of automotive paint.

The factory is equipped with a professional team of engineers. With rich experience and expertise, they continue to explore and innovate, and are committed to developing automotive paint products with excellent quality and excellent performance. Our R&D results are remarkable, and the color matching degree of finished paint is as high as 98%, which can accurately meet the color needs of various types of cars.

Production Advantages:

Advanced production equipment and a complete production chain ensure that every link from raw materials to finished products is strictly controlled to ensure the stability and reliability of product quality. About 300 experienced employees work diligently and skillfully in their respective positions, providing a solid manpower guarantee for efficient production. Meklon has engineers who have been working in the world's top automotive paint field for 30 years. They not only bring superb technology, but also provide valuable experience and unique perspectives for our product research and development. At the same time, we are equipped with mixing formula software and have professionals to explain in detail so that customers can better understand and use our products. In addition, the perfect after-sales service system allows customers to have no worries. Whether it is questions during the use of the product or the subsequent maintenance needs, we can respond in time and provide effective solutions.

In addition, Meklon provides customized services. You can send us the brand design drawings you need to customize, give us a letter of authorization, and we will customize the brand you want for you, or we have professional designers. You can tell us your ideas and needs, and we will let the designer customize it for you.

Choosing Meklon's automotive paint is choosing quality, innovation and professionalism. We will continue to be committed to providing high-quality paint products for the automotive industry and work with customers to create a better future.

product details:

1. Stunning colors, highlighting personality

Iron red is a color full of power and passion. Meklon's 2K iron red car paint shows this charm to the fullest. It has a steel-like texture and exudes fiery vitality. When the sun shines on the car body painted with this car paint, the iron red shines with a charming luster and instantly becomes the focus on the road. Whether it is a stylish sports car or a stable sedan, iron red can give the vehicle a unique personality and make your car stand out among many vehicles.

2. 2K technology, extraordinary quality

Meklon uses advanced 2K technology to bring excellent performance to this iron red car paint. 2K paint consists of a main paint and a curing agent. After the two are mixed, a chemical reaction occurs to form a strong and durable paint film. This paint film has extremely high hardness and wear resistance, and can effectively resist scratches and collisions in daily driving. At the same time, it also has excellent weather resistance. Whether it is exposed to the sun, eroded by wind and rain, or frozen in severe cold, it can maintain the bright color and lasting gloss.

3. Environmental protection concept, safety and peace of mind

While pursuing high quality, Meklon has always placed environmental protection and safety in an important position. This 2K iron red car paint meets strict environmental protection standards, does not contain harmful substances, and is harmless to the human body and the environment. It uses a low VOC (volatile organic compound) formula to reduce air pollution and create a healthy and safe driving environment for you and your family.

4. Professional service, caring guarantee

Meklon not only provides high-quality car paint products, but also provides professional services to customers. We have an experienced technical team that can provide you with the design and technical guidance of the coating scheme. Whether you are a car manufacturer, a car repair shop or an individual car owner, we can provide personalized solutions according to your needs. At the same time, we also provide perfect after-sales service to ensure that you have no worries in the process of using our products.

Choosing Meklon's 2K iron red car paint is to choose quality, choose cooperation, and choose development. After cooperating with us, many dealers have become more and more prosperous, and their sales have become better and better. From small shops to large wholesale, from wholesale to the top 500 in the country, we have witnessed the history of dealer development and the development of our company together.

**Color introduction:**

Transparent iron red car paint is a deep red color with a certain degree of transparency.

Transparent iron red car paint is a deep red that has a certain degree of transparency and can show different tones and effects under different light conditions. Transparent iron red car paint usually has good gloss and depth, giving the car a fuller appearance. Clear iron red car paint is generally weatherproof and durable, resisting the attack of sun, rain, dirt and chemicals. This helps keep your car's paint looking great for longer.

Instructions:

Product Type: Basecoat range of high-quality, two-coat topcoat systems designed for cars and commercial vehicles

Usage: Used for new car parts or repairs, no color adjustment required or only fine adjustments required.

Mixing ratio: fixative paint: thinner; 1: 0.7~1 (increase or decrease according to actual situation)

Use time after mixing: 24H

Spraying tools: nozzle diameter: 1.0-1.5mm; spray gun pressure: 3.5-4.0kg/mm;

Spraying method: wet spray 2~3 layers (5~10 minutes between layers),

Drying time: Varnish can be applied after 15 minutes to 5 hours.

Dust removal: Before spraying: use a dust cloth to remove dust.

Not suitable for substrates: thermoplastic acrylic paint or alloy primer,

Fixing paint: thinner; 1: 0.7~1 (increase or decrease according to actual situation)

Precautions:

When spraying this series of paint, you need to spray it 2 times, wet-on-wet spraying 15 minutes apart each time, to avoid fish eyes. Use the matching thinner varnish for better results, and it should not exceed 25 microns.

Market area:worldwide

Customer feedback:

"This jujube car paint has a very high color saturation, rich color and rich layers, just like a bright ruby shining in the sun. Whether in bright light or in dim environment, it can show a unique charm. Its durability is even more amazing. After long-term use and the test of various bad weather, it still maintains bright colors and a smooth surface. Compared with other brands of car paint, the quality of this product is obviously superior. It is one of the best jujube car paints we have seen on the market."

"We are very satisfied with your company's jujube car paint. Its spraying effect is extremely good, even and delicate, without any flow marks or bubbles. And the fast drying speed greatly improves our work efficiency. This high-quality product not only provides our customers with excellent car appearance, but also brings more opportunities and competitive advantages to our business."

"With It was a very pleasant experience to cooperate with Meklon. Their professional team not only provided high-quality products, but also gave us timely and effective technical support and after-sales service. During the procurement process, their communication was very smooth, and they were able to respond to our needs and provide solutions quickly. We believe that such a company will definitely achieve greater success in the automotive paint industry. "

"As an automotive paint manufacturer, your company has demonstrated extremely high professional standards and innovative capabilities. They continue to develop new products and technologies to meet market needs. This jujube red automotive paint is a good example, and its appearance provides us with more choices for procurement. We look forward to continuing to maintain a long-term cooperative relationship with Meklon and jointly exploring a broader market. "
