Product Description

Excellent Color Stability With Car Paint TopCoat For Repair Car Meklon company introduction

Car Charm is a brand of Meklon, The packaging is beautiful and the quality is good, loved by customers.

We are dedicated to producing good quality auto refinish paint. We use advanced formulations and technologies to ensure our products have excellent color stability, durability and appearance. Our car paint perfectly matches your vehicle's original color for a seamless repair.

Our employees have received professional training and guidance and have rich painting experience and skills. They are familiar with the latest painting technologies and processes and can provide professional advice and support to ensure customers obtain satisfactory results.

Our factory is fully equipped with advanced production equipment and technology. We focus on the cleanliness and organization of the factory to ensure the efficiency of the production process and the stability of product quality.

We provide one-stop solutions from raw material procurement, manufacturing, delivery to after-sales service. We have a complete supply chain management and quality control system to ensure product traceability and consistency.

We take our customers' feedback and needs very seriously. We continually strive to improve our products and services to meet our customers' expectations. We are customer satisfaction oriented and have established a good reputation and cooperative relationship.

Product Introduction

Product Name:	C-205 2K Blue Phase Special Black	Specifications:	1L/4L/5L
Features:	high covering power, high temperature resistance	Scope of application:	Cars, ships, vehicle, tanks
Color:	2K Blue Phase Special Black	Voc:	Low
Storage method:	Store in a cool, dry, ventilated and dark place	Sales scope:	global
Drying time:	surface drying time is 2 hours, actual drying time is 24 hours	Mixing ratio:	paint:curing agent:thinner=2:1:0.3
Substrate treatment:	Before spraying the substrate, the substrate must be cleaned, degreased with degreaser, and polished with 800#~1000# sandpaper. Clean it after polishing, and use degreaser to remove oil again.		
Process:	The spraying process uses wet spraying to spray 2 to 3 layers on the surface of the substrate. Pay attention to leaving 5 to 10 minutes of evaporation time between each two layers. After spraying, the paint film needs to stand for 10 to 15 minutes. Then bake. Thickness in dry film state: 35~50 microns		

Product Description

We have established a complete supply chain management system to ensure the timely supply of high-quality raw materials. We have established long-term cooperative relationships with reliable suppliers to ensure stable supply and quality of raw materials.

Our production and manufacturing systems are carefully designed to improve production efficiency and product quality. We use advanced production equipment and technology to ensure product consistency and stability. We strictly follow the quality control process to ensure that every production link meets high standards.

Our supporting systems include efficient shipping and logistics management. We work with reliable logistics partners to ensure timely delivery of customer orders, with full tracking and excellent customer service.

We are committed to providing customers with excellent after-sales service. We have a dedicated customer support team ready to answer customer questions and provide technical support. We also provide product usage guides and training to ensure customers can use and apply our automotive paint products correctly.

Our Blue Phase Special Black car paint features a deep, rich black tone with subtle blue tendencies to give your car a unique and eye-catching look.

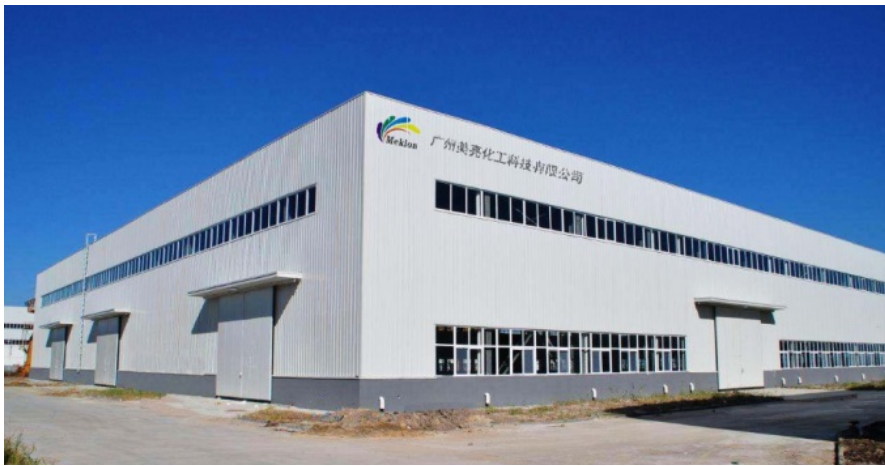

Our Blue Phase Special Black automotive coat is manufactured using high quality raw materials and advanced formulations. It has excellent durability and scratch resistance, effectively protecting vehicle surfaces from external factors.

Our blue special black vehicle paint has an excellent gloss and reflects light, giving your vehicle a brighter and more eye-catching appearance. It provides a high-gloss effect that makes the vehicle shine in the sun and accentuates its lines and curves.

We focus on providing customers with cost-effective products. Although our Blue Phase Black car paint offers superior quality and appearance, we ensure that it is priced affordably to suit the budgets and needs of different customers.

Our blue phase black car paint can be customized according to customer requirements. You can choose different gloss levels, textures or color details to meet your unique needs and achieve a personalized look.
