

High Quality Low Pollution Refinish Car Paint For Car Protection

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: P-321
- Minimum Order Quantity: 200L
- Price: 2.73/LUSD-5.56/LUSD
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500 boxes per day

Product Specification

- Brand: PROSHICHE Serise
- Color: Extra Fine White Pearl
- Code: 322
- Net Weigh: 0.95KG
- Specification: 1Lx12
- Hs Code: 320890
- Finish: Gloss
- Mixing Ratio: 4:1
- Chemical Resistant: Yes
- Uv Protection: Yes
- Heat Resistance: Yes
- Cleanup: Soap And Water
- Chemical Resistance: Resistant To Chemicals
- Uv Resistance: Yes
- Usage: Car Paint, Plastic Coating

Product Description

High Quality Low Pollution Refinish Car Paint For Car Protection

Product Description:

product name:	P-321 Extra Fine White Pearl	Specification:	1L/4L/5L
Dry Time:	2-3 hours	Net weight:	0.95KG/3.6KG/4.6KG
Instructions:	Mix with thinner 1:1 and spray directly	Gloss:	High
raw material:	pigment	Applicable:	Cars, cars, trucks, vans, buses, airplanes, tanks, ships

Ultra-fine white pearl automotive paint delivers a unique pearlescent effect, giving the vehicle body a gorgeous and sparkling appearance. Under the illumination of light, the paint surface will produce subtle changes in light and shadow, giving people a sense of depth and three-dimensionality.

Extremely fine white pearl car paint will show a variety of color changes at different angles and lighting. This versatile color effect increases the car's appeal and uniqueness, making it eye-catching in different environments.

This automotive paint not only provides a beautiful appearance, but also has good durability and protective properties. It can effectively prevent the car body from being corroded by ultraviolet rays, acid rain, dirt and other external factors, and protect the car's paint surface from damage.

Extremely fine white pearl automotive paint uses high-quality paint raw materials and advanced manufacturing processes to ensure the quality and uniformity of the coating. It provides a smooth, even finish that reduces bubbles, texture and other imperfections in the coating.

Extremely fine white pearl car paint is an advanced paint, and the construction process requires professional technology and equipment. In addition, due to its unique appearance, special processing methods and materials may be required for maintenance and repair. You can refer to the Meklon construction instructions. Manufacturer introduction:

Guangzhou Meklon Chemical Technology Co., Ltd. was established in 2014 with 25 subsidiaries and established a complete and scientific production chain. We specialize in the production of automotive paints, industrial paints, putty, Clear Coat and Hardener special curing agents for automotive paints, and automotive care products, Special unsaturated resin, various cans, cartons, etc.

Our sales network covers more than 65 countries and has more than 1,500 customers in China.

We have established good business relationships with well-known automobile manufacturers, shipbuilding and machinery manufacturers. Our products have been favored by customers at home and abroad for many years.

Our automotive paint warehouse has dedicated storage areas for various types and colors of automotive paint. These areas often employ special shelving and storage systems to ensure that paint buckets or cans are properly stored and organized.

Manufacturer

Warehouse introduction

Automotive paint has high requirements for storage conditions, so our warehouse is equipped with a constant temperature and humidity control system. This helps maintain the stability and quality of the paint and prevents it from getting wet, clumping or deteriorating.

Due to the chemical content of automotive paint, warehouses must take necessary safety measures. Including fire alarm systems, fire extinguishing equipment, ventilation systems and explosion-proof equipment to ensure the safety of the warehouse.

To effectively manage automotive paint inventory, warehouses often use inventory management systems. These systems can track inventory levels, colors and types and provide real-time inventory information for timely replenishment and dispensing of paint.

Automotive paint warehouses are equipped with quality control procedures and equipment to conduct quality checks on incoming goods. This helps ensure that the quality of the paint is up to standard and reduces the risk of poor repairs or painting results due to quality issues.

In the automotive paint warehouse, our employees must follow specific safety operating procedures. This includes wearing personal protective equipment (e.g., gloves, goggles, masks) and proper handling and storage of paint to prevent accidents and chemical exposure.

Our automotive paint warehouse adheres to environmental laws and regulations to ensure the safe handling and disposal of waste paint, containers and other chemical waste. Including waste classification, garbage disposal procedures and environmental monitoring.
