Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: P-316
- Minimum Order Quantity: 200L
- Price: 2.73/LUSD-5.56/LUSD
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500 boxes per day

Product Specification

- Brand: PROSHICHE Serise
- Color: Purple Pearl
- Code: 31
- Net Weigh: 0.95KG
- Specification: 1Lx12
- Hs Code: 320890
- Finish: Gloss
- Chemical Resistance: Resistant To Chemicals
- Application Temperature: 50-90°F
- Form: Liquid
- Drying Time: 10-15 Minutes
- Highlight: Eye-Catching Look Refinish Car Paint, Dynamic Look Refinish Car Paint

Instructions:	Mix with thinner 1:1 and spray directly	Gloss:	High
raw material:	pigment	Applicable:	Cars, cars, trucks, vans, buses, airplanes, tanks, ships

Purple pearl car paint is a special car paint containing purple pearl powder. It brings a unique color and gloss effect to car surfaces. Purple Pearl Paint will reveal a shimmering pearlescent sheen when exposed to sunlight or light, while taking on the depth and richness of a deep purple.

Purple pearl paint is made of environmentally friendly and non-polluting raw materials, does no harm to the human body, has no irritating smell and evaporates slowly.

The pearl powder of purple pearl paint will produce multiple glossy points on the paint surface. When light hits the paint surface, these points will reflect and refract the light, forming a unique flashing effect. This allows the purple pearl paint to show rich color changes under different angles and light conditions, bringing a visual layering and dynamic effect to the car.

When choosing Purple Pearl car paint, you need to consider the overall design of your vehicle and your personal preferences. Purple pearl paint can be matched with various models and body lines, adding a unique style and charm to the car.

Maintaining a car with Purple Pearl paint requires special care and maintenance. Pearl paint colors are relatively sensitive and susceptible to scratches and color changes. Regular cleaning, polishing and waxing are key to maintaining its luster and beauty.

Manufacturer introduction:

Guangzhou Meklon Chemical Technology Co., Ltd. was established in 2014 with 25 subsidiaries and established a complete and scientific production chain. We specialize in the production of automotive paints, industrial paints, putty, Clear Coat and Hardener special curing agents for automotive paints, and automotive care products, Special unsaturated resin, various cans, cartons, etc.

Our sales network covers more than 65 countries and has more than 1,500 customers in China.

We have established good business relationships with well-known automobile manufacturers, shipbuilding and machinery manufacturers. Our products have been favored by customers at home and abroad for many years.

Our automotive paint warehouse has dedicated storage areas for various types and colors of automotive paint. These areas often employ special shelving and storage systems to ensure that paint buckets or drums are properly stored and organized.

Manufacturer

Warehouse introduction

Automotive paint has high requirements for storage conditions, so our warehouse is equipped with a constant temperature and humidity control system. This helps maintain the stability and quality of the paint and prevents it from getting wet, clumping or deteriorating.

Due to the chemical content of automotive paint, warehouses must take necessary safety measures. Including fire alarm systems, fire extinguishing equipment, ventilation systems and explosion-proof equipment to ensure the safety of the warehouse.

To effectively manage automotive paint inventory, warehouses often use inventory management systems. These systems can track inventory levels, colors and types and provide real-time inventory information for timely replenishment and dispensing of paint.

Automotive paint warehouses are equipped with quality control procedures and equipment to conduct quality checks on incoming goods. This helps ensure that the quality of the paint is up to standard and reduces the risk of poor repairs or painting results due to quality issues.

In the automotive paint warehouse, our employees must follow specific safety operating procedures. This includes wearing personal protective equipment (e.g., gloves, goggles, masks) and proper handling and storage of paint to prevent accidents and chemical exposure.

Our automotive paint warehouse adheres to environmental laws and regulations to ensure the safe handling and disposal of waste paint, containers and other chemical waste. Including waste classification, garbage disposal procedures and environmental monitoring.
