Preparation work: Clean the work area, wear protective equipment such as gloves and goggles; Choose a sufficiently large clean container (such as a dedicated paint bucket).

Choose tools: electric mixer (efficient) or manual mixing rod (manual).

Mixing operation: The mixer is completely immersed in the paint solution and stirred at a suitable speed and uniform speed. The duration depends on the type of paint and the manufacturer's recommendations (usually a few minutes until the color is uniform).

Effect inspection: Confirm that the paint color and texture meet the standards, and if necessary, add thinner or color paste to fine tune the concentration/color.
