Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: AY4
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Application: Brush/Roller/Spray
- Brand: Nissan
- Chemical Resistance: Excellent
- Coverage: High
- Heat Resistance: Excellent
- Shelf Life: 1-3 Years
- UV Protection: Yes
- VOC Content: Low
- Name: Blue Pearl
- Highlight: High Gloss Car Refinish Paint, Auto Car Refinish Paint, Brilliant Car Refinish Paint

Product Description

Precious and brilliant blue pearl car refinish paint

product description:

Product name:	C-310 Blue Pearl	Net Weight:	0.95/3.6/4.6KG
Specifications:	1L/4L/5L	Raw material:	pigment
Hiding power:	Strenght	Storage conditions:	Dry, ventilated, cool place, away from fire and high temperature environment.
shelf life:	1-3 years, avoid long-term storage, it is generally recommended to use it within one year.	Gloss:	matte non-reflective
maintenance:	Easy and simple	construction:	1K Matte Black Mixed Thinner 1:1 Stir and spray directly

Blue pearl car paint is available in many different shades and shades. From bright sky blue to deep ocean blue, from refreshing icy blue to gorgeous sapphire blue, each blue brings unique style and expression to the car.

Blue pearl car paint looks stunning in the sun and reflects a pleasing glow. Some blue paints also have a pearlescent or metallic sheen effect, adding visual depth and texture.

Blue pearl car paint is suitable for various types and styles of cars, whether it is a small car, sedan, SUV or sports car, it can show different styles and personalities.

Blue car paint requires proper care and maintenance like other colors. Regular car washing, polishing and protective film can maintain the shine and durability of your paint.

Blue Pearl car paint shows a variety of color changes under different angles and viewing conditions. It may have other colors of glitter such as purple, green, or silver added to the blue base. This color change gives the car's appearance a more vivid and eye-catching character.

Blue Pearl car paint usually has a smooth texture due to the addition of pearl pigments. They form an even paint film after painting, making the car's surface feel softer and more delicate.

Mixing construction method:

Make sure the work area is clean and wear appropriate protective equipment such as gloves and glasses.

Choose a clean mixing vessel, such as a dedicated paint bucket or container. Make sure the container is large enough to hold the required amount of paint fluid and allow enough room for stirring.

Pour the car paint to be mixed into a mixing container. Determine the required amount of paint liquid based on the required quantity and color ratio.

Choose the right blender. Usually an electric mixer or stir stick is used. An electric mixer mixes paint faster, whereas a stick mixer requires manual mixing.

Insert the stirrer into the paint solution, making sure the stirrer is fully immersed in the paint solution. Start the mixer and stir the paint solution at the appropriate speed and intensity. The mixing time should be based on the type of paint and the manufacturer's recommendations. Usually, the mixing time is a few minutes until the paint liquid is uniform in color.

After mixing is completed, check whether the color and texture of the car refinishing paint fluid meet the requirements. Further adjustments can be made if necessary. As needed, thinners or pigments can be added to adjust the concentration or color of the paint solution.
