

Fine Red Pearl Customization Paint Ready Mixed Car Paint For Automotive Applications

Our Product Introduction

for more products please visit us on refinishcarpaint.com

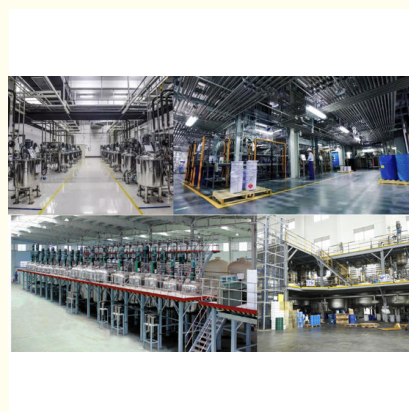

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: C-308
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Application: Brush/Roller/Spray
- Brand: Nissan
- Chemical Resistance: Excellent
- Coverage: High
- Heat Resistance: Excellent
- Shelf Life: 1-3 Years
- UV Protection: Yes
- VOC Content: Low
- Name: Fine Red Pearl
- Highlight: Customization Fine Red Pearl Paint, Ready Mixed Pearl Paint, Customization Car Pearl Paint

Product Description

Fine Red Pearl is a high-quality automotive paint with excellent performance and satisfying appearance.

Fine Red Pearl is made from high-quality materials that have been carefully developed and formulated. It undergoes strict quality control to ensure that every bottle of product meets high standards. This high-quality paint offers excellent durability and stability, maintaining its vibrant red color for a long time.

Fine Red Pearl has excellent bottle flow properties, making it easier to handle during construction. Its viscosity and fluidity are precisely controlled, making the coating process smoother and reducing dripping and uneven coating problems. This helps improve construction efficiency and ensures final paint quality.

Product name:	C-309 Interference Red Pearl	Net Weight:	0.95/3.6/4.6KG
Specifications:	1L/4L/5L	Raw material:	pigment
Hiding power:	Strenght	Storage conditions:	Dry, ventilated, cool place, away from fire and high temperature environment.
shelf life:	1-3 years, avoid long-term storage, it is generally recommended to use it within one year.	Gloss:	matte non-reflective
maintenance:	Easy and simple	construction:	1K Matte Black Mixed Thinner 1:1 Stir and spray directly

Fine Red Pearl paint has a stunning high gloss finish. It uses a special formula and light reflection effect to give the red surface a deep and rich luster. This high gloss gives the vehicle a gorgeous appearance, adding to its appeal and visual impact.

Fine Red Pearl displays a deep and rich red color. Its formula has been carefully designed to give reds multiple layers of color. This deep color brings unique charm and character to the vehicle.

Fine Red Pearl offers exceptional durability, resisting scratches, fading and oxidation from everyday use. It uses advanced protective technology to form a strong protective film that keeps the red vivid and shiny for a long time.

Fine Red Pearl is easy to apply and is suitable for different application methods such as spraying or brushing. It has good coating properties and can evenly cover the vehicle surface, showing consistent color and gloss.

Manufacturer introduction:

Meklon has a professional methods team dedicated to developing and improving automotive paint formulations and manufacturing processes. They work closely with materials scientists, chemical engineers and industry experts to ensure the automotive paint they produce is of exceptional quality and performance.

Our company has a modern factory equipped with advanced equipment and production lines for the production of various types of automotive paint. The factory adopts strict quality control measures to ensure that each batch of products meets high standards and meets customer needs.

The company maintains an independent research and development laboratory to test and evaluate the performance and durability of automotive paints. The laboratory is equipped with advanced instruments and equipment and can conduct many

experiments such as color matching, chemical analysis, weather resistance testing, etc. to ensure the quality and stability of the product.

The company has an experienced production team consisting of more than 200 employees. They are familiar with the production process of automotive paint and strictly follow the company's standard operating procedures for production. The production team pays attention to details and quality control to ensure that every bottle and barrel of automotive paint meets high-quality requirements.

Quality Assurance	High customer Satisfaction	ISO9001 Certificate
Over 20 years of Assurance	Competitive Price	Delivery Fast

GLOBAL SALES
BEAUTIFUL AND BRIGHT
TRAVEL ACROSS THE WORLD

Mixing construction method:

Make sure the work area is clean and wear appropriate protective equipment such as gloves and glasses.

Choose a clean mixing vessel, such as a dedicated paint bucket or container. Make sure the container is large enough to hold the required amount of paint fluid and allow enough room for stirring.

Pour the car paint to be mixed into a mixing container. Determine the required amount of paint liquid based on the required quantity and color ratio.

Choose the right blender. Usually an electric mixer or stir stick is used. An electric mixer mixes paint faster, whereas a stick mixer requires manual mixing.

Insert the stirrer into the paint solution, making sure the stirrer is fully immersed in the paint solution. Start the mixer and stir the paint solution at the appropriate speed and intensity. The mixing time should be based on the type of paint and the manufacturer's recommendations. Usually, the mixing time is a few minutes until the paint liquid is uniform in color.

After mixing is completed, check whether the color and texture of the car refinishing paint fluid meet the requirements. Further adjustments can be made if necessary. As needed, thinners or pigments can be added to adjust the concentration or color of the paint solution.

Customs feedback

"Meklon car paint has a very high color saturation, and it can show a unique charm whether in bright light or in dim environment. Its durability is even more amazing. After long-term use and the test of various bad weather, it still maintains bright colors and a smooth surface. Compared with other brands of car paint, Meklon car paint products are obviously superior in quality and are one of the best car paints we have seen in the market."

"We are very satisfied with your company's red car paint. Its spraying effect is extremely good, even and delicate, without any flow marks or bubbles. And the fast drying speed greatly improves the work efficiency of our customers. This high-quality product not only provides our customers with excellent car appearance, but also brings more opportunities and competitive advantages to our business."

"With It was a very pleasant experience to cooperate with Meklon. Their professional team not only provided high-quality products, but also gave us timely and effective technical support and after-sales service. During the procurement process, their communication was very smooth, and they were able to respond to our needs and provide solutions quickly. We believe that such manufacturers will definitely achieve greater success in the automotive paint industry."

"Meklon, as an automotive paint manufacturer, has demonstrated extremely high professional standards and innovative capabilities. They continue to develop new products and technologies to meet market needs. This red automotive paint is a good example, and its appearance provides us with more choices for procurement. We look forward to continuing to maintain a long-term cooperative relationship with Meklon and jointly exploring a broader market."
