Product Description

High Quality Car Repair Paint Audi LX5C Blue For Painting

Manufacturer introduction:

Meklon car paint manufacturer is a company focused on producing high-quality car paint, with 6 brands, namely CarCharm, poshiche, feria, Meishilianke, Meiguanda and Meklon, each brand has its own unique packaging and characteristics. The company has its own R&D team, including R&D engineers, who have developed car paint products from low to high quality according to the standards. M-8300 Silver Diamond Clear Coat is a medium quality automotive paint product from this company.

Meklon Auto Paint Manufacturer with nearly 20 years of expertise in the automotive paint industry. Have own team of research and development engineers along with a specialized formula system, enabling us to create customized finished paints.

product description:

Welcome to the Meklon automotive paint manufacturing factory! We are proud to introduce to you our factory's team of professional engineers and their superb skills in the production of Audi LX5C blue car refinish paint.

Our team of engineers has extensive experience and expertise in formulating refinish paint proportions. They calculated the proportions of each color and ingredient precisely to ensure that the refinish would perfectly match the original paint finish of the Audi LX5C blue model. Through a meticulous blending process, we are able to deliver refinish paint with accurate color and consistent texture to provide the best results for your car's restoration.

In order to ensure the quality and consistency of the refinishing paint, our engineers conducted multiple spray plate comparisons and inspections. During the production process, we created multiple spray panels to simulate the color and texture of different vehicle surfaces. Our engineers apply touch-up paint to these spray panels and carefully compare and evaluate them. The purpose of this is to ensure that the color and appearance of the repair perfectly matches the original paint finish, providing a seamless restoration.

Meklon's refinishing paints undergo strict quality control and testing procedures to ensure they meet the highest standards of quality in terms of durability, adhesion and resistance to fading. They stand up to daily use and environmental factors, maintaining their color and luster.

Mixed formula	
Car brand:	Audi
Applicable models:	Audi LX5C
Color name:	Explore blue
Year:	2019 Models
Depth:	Standard
Remark: Construction process: paint and thinner 1:1, wet spray twice, medium wet spray Twice, mist once, and varnish twice.

Repair construction:

Cleaning: Use car detergent and water to thoroughly clean the vehicle surface to ensure it is clean and free of dust, dirt or other impurities.

Grinding: Use sandpaper or a grinding machine to smooth the paint in the damaged area flush with the surrounding paint. Be careful not to wear away too much of the paint during the grinding process.

Filling: Use appropriate filler to fill the dents or scratches after grinding to ensure a smooth surface.

Prime: Spray the repaired area with an appropriate primer to provide adhesion to the paint surface.

Painting: Spray the repaired area with a paint finish that matches the original color of the vehicle. When painting, pay attention to spraying evenly and making a transition with the surrounding paint surface so that the repair area and the entire vehicle surface are seamlessly connected.

Varnish/Clear Coat: After applying the paint, spray it with a clear varnish to protect the paint and improve its gloss.
