

Car Detailing Supplies For Ibis White Audi LY9C Car Paint

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Audi LY9C
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

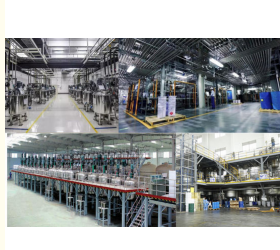

Product Specification

- Name: Audi LY9C
- Color: White
- Brand: Audi
- Highlight: Audi LY9C Car Detailing Supplies, Ibis White Car Detailing Supplies, LY9C Car Detailing Supplies

Product Description

Discover the Best Car Detailing Supplies for Ibis White Audi LY9C Car paint

Manufacturer Introduction:

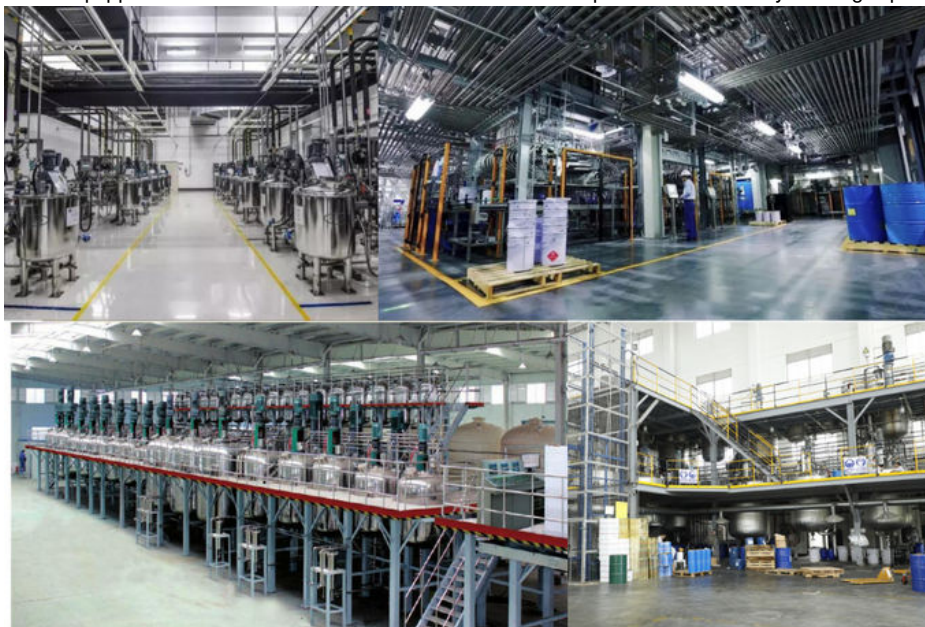

Welcome to Meklon's automotive paint manufacturing plant!

Our plant is located in Guangzhou, China, covering a large area, with advanced production facilities and technologies, dedicated to providing you with the highest quality automotive paint products.

The spacious and neatly laid out factory has more than 3,000 square meters of modern plant, ensuring an efficient and smooth production process.

In terms of production equipment, we have invested a lot of money to introduce internationally leading manufacturing equipment. From precise color matching systems to advanced mixing devices, to high-precision filling production lines, each link is equipped with the most advanced machines to ensure product consistency and high quality.

product description:

Color characteristics: Ibis white is a pure, bright white color, similar to the color of ibis feathers, giving people a simple and atmospheric feeling.

Quality: Audi car paint is generally of high quality and durability. However, white car paint may be relatively susceptible to stains, scratches and oxidation. Regular cleaning, waxing and maintenance can help keep the paint in good condition.

Leveling: Leveling refers to the ability of the paint to be evenly and flatly distributed on the surface after application. Audi car

paint usually has good leveling, which can obtain a smooth and flawless paint effect. However, the specific leveling may also be affected by construction conditions and technology.

Audi LY9C car paint Ibis White may have the following changes under different light:

Natural light: In sufficient natural light, Ibis White may appear bright, pure white with a certain glossiness.

Strong light: Under strong light, the paint surface may reflect more light, making the white more dazzling, and may even have some slight glittering effects.

Weak light or shadow: In low light environment or shadow, Ibis White may appear slightly dim, but still maintain the basic tone of white.

Angle change: The color of the paint surface may change slightly when viewed from different angles. This is due to the different angles of refraction and reflection of light.

The storage conditions of Audi LY9C car paint Ibis White are as follows:

Temperature: The suitable storage temperature is 15-25°C. Avoid too high or too low temperature to avoid affecting the quality of the paint.

Humidity: The relative humidity of the storage environment should be controlled at 50-70% to avoid excessive humidity causing the paint to get damp.

Ventilation: Keeping the storage area well ventilated helps prevent odor accumulation and moisture condensation.

Packaging: Make sure the paint container is well sealed to prevent solvent volatilization and external impurities from entering.

Fire prevention: Paint is a flammable item and should be kept away from fire, heat and open flames.

Avoid direct sunlight: Ultraviolet rays in sunlight may affect the color and performance of the paint, so it should be stored in a cool place.

Store separately: Store different types of paint separately to avoid mixing or chemical reactions.

Follow the shelf life: Pay attention to the shelf life of the paint and try to use it within the shelf life. Expired paint may have quality problems.

Factory History and Achievements:

Meklon Automotive Paint Manufacturing Factory was established in 2010. Starting from the initial small-scale production, after years of unremitting efforts and continuous development, it has gradually emerged in the automotive paint industry.

In the early days of its establishment, facing fierce market competition and many technical difficulties, we adhered to the persistent pursuit of quality and innovative spirit, and continued to explore and try. By introducing advanced production technology and equipment and cultivating professional technical personnel, we have gradually accumulated rich production experience and professional knowledge. We continue to increase investment in research and development and are committed to improving product quality and performance. After countless experiments and improvements, we have successfully launched a series of automotive paint products with independent intellectual property rights, covering a variety of colors and functions, meeting the diverse needs of different customers.

In the past few decades, our factory has achieved many remarkable achievements. Our automotive paint products have not only been widely recognized and praised in the domestic market, but also successfully exported to many countries and regions, winning the favor of the international market.

We have established long-term and stable cooperative relations with many well-known automobile manufacturers, providing them with high-quality automotive paint solutions. At the same time, we actively participate in the formulation of industry standards and promote the advancement of industry technology, making important contributions to the development of the entire automotive paint industry.

Looking back on the past, we are deeply proud; looking forward to the future, we are full of confidence. We will continue to uphold the business philosophy of "quality first, innovation driven, customer first", constantly improve our own strength, provide customers with better products and services, and create more brilliance for the development of the automotive paint industry!
