Product Description

Meklon Manufacturer Specializes In Automotive Paint For Over 10 Years

Manufacturer Introduction

I am an automotive paint manufacturer with my own factory, which covers an area of 3,000 square meters. I have been engaged in the automotive paint industry for 20 years. We have independent laboratories and R&D teams, production teams, sales teams, after-sales teams, etc. We are fully equipped with our own masterbatch charts and color cards. We have independently developed color matching for various types of finished paints, as well as a separate set of finished paints for Russian and Kazakh models. We have a color mixing formula software app. At present, our finished paints are very mature, with monthly sales reaching 5 million.

Product Description

In terms of color, we have perfectly reproduced this unique and charming champagne gold with exquisite color matching techniques and strict quality control. Sparkling in the sunlight, it is very similar to the 1B2 champagne gold color of Toyota's original car, which can immediately restore your car to its original style.

In terms of quality, Meklon uses high-quality raw materials and advanced production technology to ensure the durability, wear resistance, and corrosion resistance of the paint surface.

Code	Name	Proportion
412	Medium Silver	39.08%
104	1K Black	24.72%
128	1K Transparent Iron Red	2.12%
130	1K Frost Blue	2.17%
313	Young Green Pearl	20.48%
311	Young Blue Pearl	10.83%
125	1K Bright Red	0.30%
102	1K Extra White	0.30%
Total		100.00%

It has excellent leveling performance. During the construction process, it can be evenly distributed on the surface of the car body, forming a smooth mirror effect, without any sag, orange peel and other defects, making the car body lines more smooth and beautiful.

Weather resistance is outstanding. Whether it is hot summer, cold winter, or changeable climate conditions, this paint can maintain the bright color and integrity of the paint surface, and resist the erosion of natural factors such as ultraviolet rays and acid rain for a long time.

Moreover, not only Toyota 1B2 Champagne Gold, our factory also has a rich product line that can restore various colors of various models. No matter what brand, model, or color your car is, we can provide you with a precisely matched car paint.

In terms of price, we have been committed to providing customers with cost-effective products. While ensuring high quality, we optimize production and management to bring you very competitive prices.

If you have a need for car paint, please feel free to contact us. We will serve you wholeheartedly and make your car shine again!

Looking forward to your call!
