

Toyota 218 Black Pearl Mixing Finish Paint Factory

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Toyota 218
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

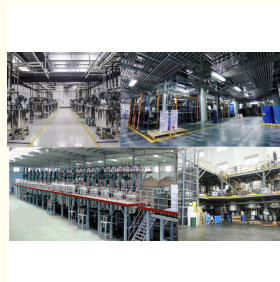

Product Specification

- Name: Toyota 218 Black Pearl
- Durability: Long-lasting And Reusable
- Main Raw Materials: Resine, Solvent, Pigment, LPG
- Product Usage: Exterior Car Cleaning
- Special Features: Scratch-free And Streak-free Formula
- Colors: Red Pearl
- Application Area: Chemical
- Mixer Type: Static Mixers
- Storage: Cool And Dry Place
- Function: Cleaning
- Highlight: **218 Black Pearl Mixing Finish Paint,
Black Pearl Mixing Finish Paint Factory**

Product Description

Toyota 218 Black Pearl Mixing Finish Paint Manufacture Factory

Manufacturer Introduction:

I am an automotive paint manufacturer with my own factory, which covers an area of 3,000 square meters. I have been engaged in the automotive paint industry for 20 years. We have independent laboratories and R&D teams, production teams, sales teams, after-sales teams, etc. We are fully equipped with our own masterbatch charts and color cards. We have independently developed color matching for various types of finished paints, as well as a separate set of finished paints for Russian and Kazakh models. We have a color mixing formula software app. At present, our finished paints are very mature, with monthly sales reaching 5 million.

product description:

This paint color is numbered 218 and has a cool name, "Attitude Black Pearl". It is a special paint color for Toyota cars. Toyota 218 Black Pearl is a polyurethane base coat paint with low volatile organic compounds (VOC). This paint has excellent color accuracy and excellent coverage. It is specially designed by Meklon for all automotive surface restoration work!

It is unique in that the vehicle has a unique texture and sheen by adding pearl powder instead of traditional metal powder. When the light shines on the body, you will see it shimmering and the color will change subtly from different angles. It's so cool!

We offer a variety of packaging specifications for you to choose from, such as 11 ounces of aerosol spray cans, which are very convenient to pick up and spray directly (already pre-mixed, no need to dilute). Of course, there are also 1X12 cans, 4LX6 cans, and 5LX4.

It should be noted that when using this paint, it must be used with clear-coat to ensure the correct gloss and exterior durability. Dear car lovers, if you want to make your Toyota more unique and dazzling, Toyota 218 Black Pearl is definitely a great choice!

Of course, we also have color mixing formula software. You can use our 1K.2K color paint, varnish hardener, etc. to mix the colors of various models according to our formula.

Toyota 218 Black Pearl				
code	name	Proportion	price	Amount
104	1K all black	21.70%		0.00
105	1K extra black	73.80%		0.00
310	Blue pearl	4.34%		0.00
404	Fine silver	0.16%		0.00
total		100.00%		0.000

Weather resistance is also excellent. Whether it is the hot deserts of the Middle East, the humid monsoon climate of Southeast Asia, or the changeable weather conditions in Europe and Africa, our car paint can maintain bright and lasting colors, not easy to fade and peel, and always maintain a good appearance.

If you have any needs for our car paint products, please feel free to contact us.

Looking forward to working with you to give your car a new look together!

Toyota 218 Black Pearl This pearl paint has good durability, but the specific durability is still affected by many factors. Meklon car paint is very weather-resistant and can maintain a lifespan of five to eight years. If the spray car paint is properly maintained, it can also achieve a similar length of time.

Compared with ordinary paint and metallic paint, the pearl paint is more complicated to process. Its advantage is that by adding pearl powder, the vehicle can present a unique texture and gloss, which can produce rich visual effects in the sun, and has a high hardness and a certain scratch resistance. However, its disadvantage is that it is relatively complicated to repair, the cost is high, and color difference is prone to occur.

To extend the durability of car paint, here are some maintenance suggestions:

Wash the vehicle regularly, clean the stains on the body in time, and avoid damage to the paint surface by dust, debris and corrosive substances;

Try to reduce the exposure of the vehicle to the sun and prevent direct sunlight from fading the paint surface;

After being washed by rain, wash the vehicle with clean water to avoid acid rain corrosion;

Maintenance measures such as waxing, sealing glaze, coating or applying invisible car cover can be carried out to increase the protective layer of the car paint and improve durability. Among them, waxing is a more economical way, which can resist the damage of harmful external components and ultraviolet rays to the car paint and improve the gloss of the car paint, but the maintenance time is relatively short and needs to be carried out frequently; sealing glaze can increase the strength of the car paint and prevent the occurrence of small scratches, and the maintenance time can reach three to four months; coating can form a layer of transparent protective film, providing stronger protection ability, and the maintenance time is generally about one year; invisible car cover is an advanced protection method that can resist the damage of various harsh environments to the car paint and maintain for up to five to seven years.

The vehicle's use environment, maintenance frequency and method, and driving habits will all affect the durability of the paint. If you have high requirements for the durability of the paint, in addition to daily maintenance, you must also pay attention to avoiding collisions and scratches on the vehicle.

Our advantages:

Ensure that customers can get timely and professional support in the process of consulting, purchasing and using products. Take customer opinions and suggestions seriously and continuously improve products and services.

Meklon continues to improve product quality to ensure color accuracy, durability and environmental protection. And continue to develop new colors and products to meet the diverse needs of the market.

We provide free samples and trials. For potential large customers or companies with cooperation intentions, we provide free sample trials to experience the advantages of the products firsthand.

Customer feedback:

"I run an auto repair shop and have been looking for a high-quality and stable auto paint. Since using your product, it has really solved my big problem! Your auto paint has accurate color and strong covering power. Whether it is a small area repair or a full car spray, the effect is perfect. And it has excellent weather resistance. After customers use it for a long time, the paint surface is still bright and beautiful. Thank you very much for providing such an excellent product!"

"As a car modification enthusiast, the requirements for paint are quite high. After trying your car paint, I am so satisfied! The color is rich and unique, especially the metallic paint, which instantly upgraded my car to a higher level. During the construction process, the paint has good leveling and dries quickly, which greatly shortens the modification time. I highly recommend it to other friends who modify their cars!"

"We are a large car beauty chain store. After cooperating with you, customer satisfaction has been greatly improved. Your car paint is of high quality. Not only is the color full and lasting, but it is also hard and wear-resistant, and can withstand various daily wear and tear. At the same time, your after-sales service is also very thoughtful, so we have no worries during use. We will continue to cooperate with you!"

Factory History and Achievements:

Meklon Automotive Paint Manufacturing Factory was established in 2010. Starting from the initial small-scale production, after years of unremitting efforts and continuous development, it has gradually emerged in the automotive paint industry.

In the early days of its establishment, facing fierce market competition and many technical difficulties, we adhered to the persistent pursuit of quality and innovative spirit, and continued to explore and try. By introducing advanced production technology and equipment and cultivating professional technical personnel, we have gradually accumulated rich production experience and professional knowledge. We continue to increase investment in research and development and are committed to improving product quality and performance. After countless experiments and improvements, we have successfully launched a series of automotive paint products with independent intellectual property rights, covering a variety of colors and functions, meeting the diverse needs of different customers.

In the past few decades, our factory has achieved many remarkable achievements. Our automotive paint products have not only been widely recognized and praised in the domestic market, but also successfully exported to many countries and regions, winning the favor of the international market.

We have established long-term and stable cooperative relations with many well-known automobile manufacturers, providing them with high-quality automotive paint solutions. At the same time, we actively participate in the formulation of industry standards and promote the advancement of industry technology, making important contributions to the development of the entire automotive paint industry.

Looking back on the past, we are deeply proud; looking forward to the future, we are full of confidence. We will continue to uphold the business philosophy of "quality first, innovation driven, customer first", constantly improve our own strength, provide customers with better products and services, and create more brilliance for the development of the automotive paint industry!
