

Advanced Automated Production Lines For White Car Paint Basecoat Manufacturing

Our Product Introduction

for more products please visit us on refinishcarpaint.com

Basic Information

- Place of Origin: China
- Brand Name: PORSHICHE
- Certification: ISO,MSDS,SGS
- Model Number: 101
- Minimum Order Quantity: 200L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Name: Orange
- Code: 101
- Color: White
- Net Weight: 0.95KG
- Heat Resistance: Yes
- Protection: UV-resistant
- Sheen: High Gloss
- Uv Resistance: Yes
- Material: Acrylic
- Application Method: Brush, Roller, Or Spray
- Adhesion: Strong
- High Light: 1K Basecoat
- Highlight: Automated Production Lines Car Paint Basecoat
, White Car Paint Basecoat,
1K Acrylic Car Paint Basecoat

Product Description

Manufacturer introduction:

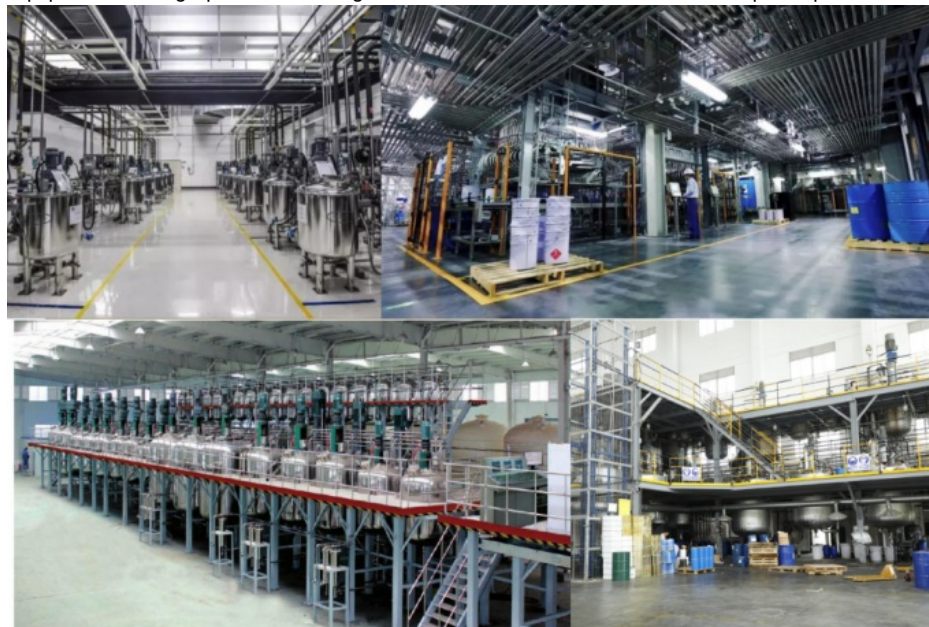

Our production plant was established in 2010. It has gradually grown from an initial small factory to a modern enterprise with large production scale, complete industrial chain, advanced equipment and high production efficiency.

Production scale: The factory covers a large area and has many advanced automated production lines to meet the needs of different customers.

Complete industrial chain: From raw material procurement, production and processing, quality inspection to packaging and transportation, a complete industrial chain has been formed to ensure the quality and supply stability of the products.

Advanced equipment: Advanced domestic and foreign production equipment and technologies such as automated spraying equipment and high-precision testing instruments have been introduced to improve production efficiency and product quality.

High production efficiency: By optimizing production processes, strengthening management and technological innovation, we continuously improve production efficiency and reduce production costs.

Staff: We have more than 200 professional production staff who are experienced and skilled, and can guarantee the quality and production progress of our products. In addition, there are 8 R&D masters who are committed to the development of new products and technological innovation; 10 sales teams who actively expand the market and provide customers with high-quality products and services; 20 after-sales staff who promptly solve customer problems and feedback to ensure customer satisfaction.

In short, our 1K white car paint has won high praise and satisfaction from our customers for its high quality, good effect, high gloss, weather resistance and reasonable price, as well as perfect after-sales service. We will continue to work hard to continuously improve product quality and service level and provide customers with better products and services.

Product details:

1K white car paint is a single-component car paint, usually composed of film-forming substances, pigments, solvents and additives. Its main features are easy use, fast drying speed, and can be dried naturally at room temperature. As a classic car color, white is simple and elegant, with high recognition and beauty.

Quality: Use high-quality raw materials to ensure the stability and reliability of the paint.

After strict quality inspection, it meets relevant industry standards and environmental protection requirements. It has good adhesion and can be firmly attached to the surface of the car and is not easy to fall off. Effect: The color is pure, the white is bright and bright, giving people a fresh and clean feeling. It can effectively cover the flaws and scratches on the surface of the car, making the surface of the car body smoother. It has a certain glossiness and can enhance the appearance texture of the car.

1K white car paint has a high glossiness, which can make the surface of the car present a bright gloss. The level of gloss depends on the type and proportion of pigments and additives in the paint, as well as the quality of the construction process. Generally speaking, after professional spraying and polishing, 1K white car paint can achieve a higher glossiness, making the car look more beautiful.

Weather resistance: Weather resistance refers to the ability of the paint to resist various factors (such as ultraviolet rays, temperature, humidity, rain, etc.) in the natural environment. 1K white car paint has good weather resistance and can maintain color stability and glossiness under different climatic conditions. The main reason is that weather resistance additives are added to the paint, which can effectively resist the erosion of ultraviolet rays and prevent color fading and yellowing. The shelf life of 1K white car paint is generally about 12 months to 24 months, depending on the storage conditions and packaging methods. During storage, it should be avoided from direct sunlight, high temperature, humidity and other environments to avoid affecting the quality and performance of the paint. At the same time, the paint should be sealed to prevent solvent evaporation and air from entering.

Our 1K white car paint has won high praise and satisfaction from customers for its high quality, good effect, high gloss, weather resistance and reasonable price. Customer feedback shows that the paint is easy to use, fast drying, pure color, high gloss, good weather resistance, and can meet the needs of different customers. We have been committed to providing customers with high-quality products and services, and continuously improving and enhancing product quality to meet customer expectations and requirements.

In recent years, with the rapid development of the automotive industry and the increasing requirements of consumers for the appearance of cars, the sales of 1K white car paint have also increased year by year. Our products are not only widely welcomed in the domestic market, but also exported to many countries and regions, winning a good market reputation and share. We will continue to increase market promotion efforts, continuously expand sales channels, and increase the market share of products.
