Product Description

Product Description

Advantages Category	Specific advantages
Performance	High performance formula with high paint film hardness, strong wear resistance, excellent UV resistance and weather resistance, long-term non fading and non yellowing.
Color effects	Accurately matching the original ice lake blue tone, with high and pure color saturation, providing customized services to meet personalized needs.
Process adaptation	Good leveling performance, easy to spray, adaptable to various construction methods, easily achieving high gloss or delicate texture coating effects.
Compatibility	Good compatibility with mainstream primer/varnish systems, ensuring multi-layer coating adhesion and overall stability.
Environmental Economy	Low VOC emissions, in compliance with environmental standards; Balancing customization flexibility and reasonable cost, the cost-effectiveness is superior to high-end original factory alternatives.

Elevating Excellence through Pristine Raw Materials:

Our unwavering dedication to providing uncompromised quality is based on a carefully curated collection of metallic raw ingredients that we receive from leaders in the automotive paint industry. Our persistent commitment to color authenticity and unrelenting search for unparalleled hues drive us to proactively integrate with prestigious industry hubs like BASF, MERCK, ECKART, EASTMAN, DSM, BYK, and BAYER.

Our color constancy and unwavering quality—a symphony of automotive precision—are founded on this strategic relationship.

Our prestigious status as BASF's strategic partner, which serves as a concrete witness to our crucial role as a key Chinese explorer of their finest raw resources, is of the utmost importance. By continually exceeding your expectations and redefining the very standards that support the automotive paint landscape, this relationship serves as a tribute to our unwavering dedication to leading the way in automotive excellence.
