

High Performance UV Resistant Bright Red Car Repair Paint

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Meklon
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Solvent Resistant: Yes
- Application Method: Spray
- Environmentally Friendly: Low VOC Emissions
- Mixer Type: Static Mixers
- Application: Spray
- Net Weight: 0.95KG
- Uv Resistant: Yes
- Color Options: Multiple
- Product Type: Car Paint
- Curing Time: 24 Hours
- Fade Resistance: Yes
- Heat Resistance: Yes

Product Description

1, African market: dual advantages of weather resistance and visual impact

Strong UV resistance: Most parts of Africa (such as sub Saharan Africa and the East African plateau) have strong sunlight and a UV index of ≥ 7 throughout the year. The bright red paint uses highly weather resistant pigments and UV resistant additives, which are not easily faded or powdering after long-term exposure to sunlight (ordinary red paint visibly darkens after 3-5 years, while Meklon bright red can remain bright for more than 5 years).

High temperature and dryness resistance: In desert/tropical climates (such as Saudi Arabia and Ethiopia), temperatures often reach 40-50 . After curing, the bright red paint film has excellent temperature resistance (withstanding 60 +) and is not easily softened or flowed due to high temperatures, maintaining a smooth and glossy appearance.

High recognition and cultural adaptation: Red symbolizes vitality and celebration in African culture (such as weddings and holiday cars), and the high saturation of bright red paint (high color fastness) has a strong visual impact in sandy/earthy backgrounds, enhancing vehicle visibility and meeting the personalized needs of taxis and commercial vehicles.

2, Middle East market: perfect match between extreme environment and high-end demand

Resistance to extreme high temperatures and sandstorms: In the Middle East, where the surface temperature exceeds 60 in summer (such as Dubai and the United Arab Emirates), the bright red paint is resistant to thermal oxidation through a high-temperature resistant resin formula, and does not fade or crack after long-term exposure to sunlight; At the same time, the paint film is dense and resistant to sand and dust wear (such as the bright red coating commonly used in off-road vehicles and SUVs).

Luxury car market adaptation: The Middle East is one of the regions with the highest sales of luxury cars (such as Rolls Royce and Bentley) in the world. The high gloss (mirror effect) of bright red paint and the metallic texture (such as bright red metallic paint) are optional, which can highlight the luxury and personality of luxury cars and meet the customization needs of high-end customers.

Religious and cultural symbols: Red symbolizes passion and power in some parts of the Middle East (such as Saudi racing culture), and bright red car paint is often used for racing/modified cars, which become identity symbols when paired with high-performance accessories.
