

High Cost Performance, Fast Drying And Long-Lasting High Sky Blue Car Paint

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Meklon
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Package Size: 1LX12
- Curing Time: 24 Hours
- Chemical Resistance: Yes
- Working: Agitator
- Productname: Vehicle Car Paint
- Application Area: Chemical
- Safety Features: Non-toxic, Non-flammable
- Material: Acrylic
- Sheen: Various Sheen
- Color: Various Colors Available

Product Description

Meklon car paint vs regular car paint

Comparing dimensions	Meklon Sky Blue Automotive Paint	Ordinary blue car paint
Color expression	High purity sky blue: The color is fresh and transparent, close to the soft blue of natural sky (precise hue, no gray tone/dullness), with high visual comfort.	The color saturation is average, and it is prone to gray, dark, or purple (such as ordinary turquoise), resulting in strong visual fatigue.
Gloss	High gloss mirror effect: After the paint film dries, it presents a gloss of over 95% (mirror reflection is uniform and delicate), enhancing the overall delicacy of the vehicle.	The glossiness is average (about 70% - 85%), and it is prone to fog, orange peel, and blurred reflection due to construction or environment.
Weather resistance	Strong UV resistance: The formula contains UV absorbers, which will not fade or yellow after long-term exposure to sunlight (maintaining their original color for more than 5 years), and are suitable for high temperature/high humidity environments.	Weak UV resistance, significant fading (lightening/graying) occurs within 1-2 years, and tropical/plateau areas are prone to aging.
Scratch resistance	High hardness (2H-3H): resistant to stone impact and frequent friction (such as car wash marks and tree branch scratches), with good paint film integrity.	Low hardness (HB-B), easy to leave scratches, requires frequent polishing and repair, and the gloss decreases quickly after long-term use.
Adaptation scenario	Multi purpose: Suitable for cars/sports cars/motorcycles, especially recommended for new energy vehicles (fresh color matching) and personalized needs of young users.	Most of them are conventional car colors, with ordinary adaptability and a lack of differentiated highlights.
Construction friendliness	Easy to spray: Stable fluidity, not prone to sagging/orange peel (moderate drying speed), easy to operate for DIY or professional construction.	Poor leveling performance requires high skill control (such as spray gun pressure/distance), and beginners are prone to defects.
Brand advantage	Meklon exclusive: 98% OEM color matching (accurate restoration of original factory sky blue), providing customized color matching services; 1K/2K dual system optional (flexible balance of cost and performance).	The color deviation of ordinary brands is large (matching degree<70%), making customization difficult, and mostly using a single curing system.
