

High Performance Recovery Car Paint, High Gloss And Easy To Spray Bright Red Car

Our Product Introduction

for more products please visit us on refinishcarpaint.com

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Meklon
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Surface Preparation: Sanding And Priming
- Heat Resistance: Yes
- Fields Of Use: Car Repair/car Detailing
- Type: Ready Mixed Paint
- Weather Resistance: Yes
- Package Size: 1LX12
- Gloss Retention: High
- Easy To Clean: Yes
- Manufacture: Meklon
- Finish: Glossy

Product Description

Meklon Red Automotive Paint Core Advantages

1. Ultimate highlight performance

Mirror level gloss: After the paint film is dried, the gloss is $\geq 95\%$, the reflected light is uniform and transparent, presenting a "factory grade" bright red color, far exceeding the dull or matte effect of ordinary red paint.

High color saturation: using high-purity organic red pigments, the color is rich and full (not dark red/gray tone), with strong visual impact, suitable for car models that pursue eye-catching appearance (such as sports cars and modified cars).

2. Easy to spray construction

Low risk of sagging: The viscosity and flowability of the paint have been optimized, making it less prone to dripping or orange peel during spray gun operation (with uniform drying speed). Novice or professional technicians can easily obtain a smooth coating.

Strong compatibility: Suitable for various spraying equipment (high/low pressure spray guns), supports 1K (fast drying) and 2K (high hardness) systems, and flexibly matches different construction scenarios (repair/vehicle refurbishment).

3. Excellent durability

UV resistant: The formula contains UV absorbers, which will not fade or pulverize after long-term exposure to sunlight (maintaining a bright red color for more than 5 years). It is suitable for high temperature/strong light exposure areas (such as deserts and plateaus).

Wear resistant and scratch resistant: The 2K system paint film has a hardness of 2H-3H, which resists daily wear and tear such as stone impact and car wash friction, reducing the frequency of scratch repair.

4. Fast and efficient drying

15 minute flash drying, 1-hour hard drying: significantly reduces workshop hours, improves spraying efficiency (especially in batch repair scenarios), while ensuring high hardness and gloss of the fully cured paint film.

5. Environmental Protection and Flexibility

Low VOC option: Provides water-based/high solid solvent based solutions that comply with EU REACH and US EPA standards, reducing environmental pollution and construction health risks.

Accurate color matching: 98% OEM color matching (restoring the original factory bright red tone), supporting customized color matching (such as fluorescent red, metallic red), meeting personalized needs.

6. Cost effectiveness advantage

Cost controllable: The unit price is 30% -50% lower than that of imported high-end brands, but the performance is comparable to the original factory paint, making it suitable for repair shops to control budgets while providing high-quality services.
