

## High Performance And High Gloss Wear-Resistant Dark Red Car Spray Paint

Our Product Introduction

for more products please visit us on [refinishcarpaint.com](http://refinishcarpaint.com)

### Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Meishilianke
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

### Product Specification

- Indoor/outdoor: Indoor/Outdoor
- Surface Preparation: Requires Clean And Smooth Surface
- Environmentally Friendly: Low VOC Emissions
- Scratch Resistant: Yes
- Drying Time: Fast Drying
- Scratch Resistance: Highly Resistant To Scratches
- Safety Features: Non-toxic, Non-flammable
- Heat Resistance: Yes
- High Light: Honda Ready Mixed Car Paint

## Product Description

### High Performance And High Gloss Wear-Resistant Dark Red Car Spray Paint

#### 1. Excellent weather resistance: not afraid of environmental erosion

*Anti UV aging:* Adding double UV absorbers and antioxidants, long-term exposure does not fade or yellow (laboratory tests show a 5-year color retention rate of  $\geq 95\%$ ).

*Acid resistant rain/salt spray:* The paint film has strong density and can resist acid rain and coastal salt spray corrosion, avoiding the common rust spot penetration problem of deep red paint.

*Extreme temperature stability:* No cracking or foaming in environments ranging from  $-30$  to  $120$ , suitable for climate differences between the north and south.

#### 2. Mirror level high gloss: Full visual impact

*Ultra high glossiness:* After drying, the glossiness of the paint film is  $\geq 95\text{GU}$  (measured at a  $60^\circ$  angle), far exceeding that of ordinary car paint (usually  $70\text{--}85\text{GU}$ ), presenting a "mirror reflection" effect.

*High color saturation:* Using high-purity organic red pigments (such as PR170+PV19 compound), the color depth reaches Pantone 186C standard, which is more vibrant and eye-catching than ordinary deep red paint.

*Low orange peel pattern:* Optimized spray viscosity and leveling agent ratio, resulting in a smooth and mirror like paint surface with no graininess in details.

#### 3. Super durable protection: lasting as new

*High hardness paint film:* The pencil hardness reaches 3H (about 2H for ordinary car paint), resisting stone splashes and tree branch scratches without leaving any marks.

*Scratch resistant coating:* Adding nano ceramic particles reduces friction coefficient by 40%, making it less prone to scratches during daily car washing and minor collisions.

*Chemical corrosion resistance:* Resistant to chemical erosion such as brake oil and engine oil, avoiding the problem of "whitening" caused by penetration of dark paint.

#### 4. Professional construction friendly: efficient and stable

*Fast drying and low energy consumption:* 1K/2K system is optional, with a flash drying time of  $\leq 15$  minutes at room temperature (an average of 20 minutes for similar products), improving the turnover rate of the spray booth.

*Accurate color matching support:* Provides digital color cards and Tinting Guide, compatible with mainstream substrates such as Meklon MK-1K, ensuring color consistency.

*Low VOC environmental compliance:* Compliant with the EU REACH regulation, with a volatile content of less than  $350\text{g/L}$ , balancing environmental protection and health.

#### 5. High end texture and value preservation and appreciation

*Luxury visual experience:* The combination of deep red and highlights gives the vehicle a "sporty luxury" attribute, suitable for sports cars, modified cars, or business models.

*Long term preservation:* Wear resistant and weather resistant properties reduce the need for repainting, and the paint surface condition is better during the evaluation of second-hand cars, increasing the residual value rate.
