

## High Gloss Matching Original Factory Color Car Paint Red Car Spray Paint

Our Product Introduction

for more products please visit us on [refinishcarpaint.com](http://refinishcarpaint.com)

### Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Ferrari
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

### Product Specification

- Size: Various Sizes
- Produce Name: Ferrari
- Dryingtime: 30 Minutes
- Package: Can/carton
- Color Options: Multiple
- Application: Spray
- Scratch Resistance: Highly Resistant To Scratches
- Voc: Low
- Uv Resistance: Yes
- Product: 2K Repair Paint
- Environmentally Friendly: Low VOC Emissions
- Weather Resistance: Yes
- Curing Time: Varies By Product
- Uv Resistant: Yes

## Product Description

### Storage conditions:

**Temperature requirements:** The temperature of the storage environment should be maintained between 5 and 30 degrees Celsius. Too high a temperature may cause changes in the paint composition, such as accelerating the evaporation of solvents and affecting the stability of the paint; too low a temperature may cause the paint to thicken or crystallize, destroying the original performance of the paint.

**Humidity control:** The relative humidity needs to be maintained at 40% - 60%. Too high a humidity can easily make the paint damp, causing problems such as mildew and agglomeration; while too low a humidity may generate static electricity, adsorb dust and impurities to the surface of the paint, affecting the quality.

**Light conditions:** The storage place should avoid direct sunlight. Long-term light will cause the pigments in the paint to fade and decompose, and may also cause photochemical reactions in the chemicals in the paint, reducing the quality and service life of the car paint.

**Ventilation:** Good ventilation is the key. Ventilation helps to dissipate the small amount of volatile organic compounds that may exist in the paint, prevent them from accumulating in the storage space, avoid adverse effects on the quality of the paint, and also ensure the safety of the storage environment.

**Packaging sealability:** Whether it is paint or hardener, its original packaging should be kept sealed. Sealed packaging can prevent the entry of impurities such as air and moisture, ensuring that the paint is not contaminated or oxidized during storage.

**FARALLI Car Paint**

### Shelf life:

Our car paint has an impressive shelf life. The hardener has a shelf life of 1-3 years, and the paint has a shelf life of 5-10 years. It is particularly worth mentioning that under certain storage conditions, the overall shelf life of our car paint can be up to 10 years. This excellent performance provides long-term protection for your use.

### Warranty service:

We are confident in the quality of our products. During the warranty period of 1 year for hardener and 3 years for paint, if you find any quality problems with the product, you can contact us at any time and go through the return procedures. We will do our best to solve the problem for you, ensure that your rights and interests are not harmed, and let you use our car paint products without worries.

As a professional car paint manufacturer, Meklon, we have always regarded product quality as the lifeline of the enterprise, and because of this, we have won high recognition from many car paint dealers.

In the long-term cooperation with dealers, our high-quality car paint has become a solid backing for their business development. Many dealers have reported that our products have established a good reputation in the market with their excellent quality. Whether in terms of color durability, paint hardness or corrosion resistance, Meklon car paint performs well. Whether it is the pursuit of extreme color effects by high-end car modification shops or the requirements of durability by ordinary car repair shops, our products can meet them.

We have established a close cooperative relationship with dealers and can respond quickly to their order needs and after-sales problems. A stable supply chain ensures that they will not lose customers due to product shortages, and an efficient after-

sales team can solve possible quality problems in a timely manner, further enhancing the dealer's reputation in the hearts of customers.

Meklon's professionalism in the field of car paint and its comprehensive support for dealers have become the key factors in promoting their booming business, and the affirmation of dealers has also inspired us to keep moving forward and continue to provide better products and services for the automotive industry.
