

## Hot Selling And Cost-Effective Bright Orange Car Repair Paint For Car Painting

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Ferrari
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

#### Product Specification

- Durability: Long-lasting
- Type: Automotive Paint
- Series: Ferrari Series
- Water Resistant: Yes
- Special Features: Scratch-free And Streak-free Formula
- Product Type: Automotive Paint
- Coats: 2-3
- Voc: Low VOC
- Color Options: Multiple
- Suitable Surfaces: Metal, Plastic, Fiberglass
- Package: Can/carton

## Product Description

### Core advantages of the product

#### Ultimate color expression

1. *High saturation fluorescent orange*: using imported organic orange pigment, the color is bright and eye-catching, with strong coverage, easily restoring classic orange or trendy fluorescent orange (such as retro sports car, modified car exclusive color).
2. *High gloss mirror effect*: The glossiness of the paint film is  $\geq 92\%$ , and after drying, it presents a mirror level reflection, enhancing the visual impact of the entire vehicle (optional matte varnish can be used to achieve various styles).

#### Super durable protection

1. *Anti UV aging*: Adding UV absorbers and antioxidant ingredients, long-term exposure to sunlight will not fade or yellow (tested in high-temperature regions of the Middle East/North America for 5 years color retention).
2. *Corrosion and Wear Resistance*: The paint film hardness reaches 2H-3H, and it is resistant to acid rain, bird droppings, stone strikes, and daily car washing friction, making it suitable for long-term outdoor use.

#### Efficient construction experience

1. *Fast drying saves time*: 1K system can flash dry in 15 minutes, 2K system can flash dry in 20 minutes (2-hour hard drying), greatly improving workshop efficiency; Low risk of sagging, excellent spray smoothness.
2. *Accurate color matching*: Supports Pantone color matching (such as 1585C fluorescent orange), provides free color matching services, and ensures seamless connection between the repaired area and the original car paint.

#### Environmental economy

1. *Low VOC formula*: reduces construction pollution; High solid content design reduces the number of spray layers and saves material costs.
2. *Ultra high cost-effectiveness*: The manufacturer's direct supply price is 15% -20% lower than similar products in the market, and packaging is provided to reduce the purchase price.

### Market success cases and customer feedback

**Middle East:** A high-end modification factory in Dubai made bulk purchases for the Lamborghini Aventador fluorescent orange coating. Customer feedback stated that the paint film hardness exceeded expectations and there were no cracks under high temperatures in the desert.

**Africa:** Kenya Taxi Company's annual procurement volume has increased by 30% due to its "single-layer spraying saves time and materials, and its anti fading effect far exceeds that of competitors".

North America: Designated supplier by the Classic Car Club of Canada, replicating the 1970s Chevrolet Camaro in "Flame Orange" color, with a customer satisfaction rate of 98%.
