Customer Witness: Meklon Automotive Paint Real Feedback

As a car repair chain brand with 20 years of experience, we have been fully adopting Meklon car paint series products since 2022. What impressed us the most was the performance of its 2K high curing varnish - despite processing 30 vehicles per day, the paint hardness remained at the 2H level, and the repair rate decreased by 60% year-on-year. Especially the pearl white three process system, which perfectly matches the Mercedes Benz original color code, has increased customer satisfaction to 98%. The intelligent color matching solution provided by Meklon's technical team helps us save about 15% of coating costs per month. Now, all 12 of our branches have designated Meklon as the sole automotive paint supplier. "
