Product Description

Meklon High gloss Champagne Gold Automotive Repair Paint vs. [Wear resistant Scratch resistant Light Champagne Automotive Spray Paint Comparison](#)

Comparing dimensions	High Gloss Champagne Gold	Wear-Resistant Light Champagne
Core selling points	Ultimate gloss matches the original factory color	Super abrasion resistance and scratch protection
Applicable scenarios	High end car repair, original color restoration of new cars	High frequency use of vehicles (taxis, commercial vehicles), easily scratched areas
Target customers	Luxury car 4S dealership, high-end modification factory	Fast repair chain stores, fleet operators

Durability and Protection

1.High gloss champagne gold:

Standard hardness 2H, conventional UV resistance (3-year color retention rate $\geq 85\%$).

2.Durable light champagne:

Hardness of 3H+, added with nano ceramic particles, resistant to stone splashing and key scratching (tested 500 times with steel wool friction without marks).

5-year color retention rate $\geq 90\%$, dual protection against UV and chemical corrosion.

Construction characteristics

1.High gloss champagne gold:

High solid varnish (recommended 2K varnish) is required, and the spraying environment requires high standards (dust-free workshop).

2.Durable light champagne:

Flexible selection of single component/two-component, quick drying formula (surface drying for 10 minutes), suitable for outdoor quick repair.
