

Scratch Resistant Automotive Paint - Black Gold Gray - Low Odor

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Toyota
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Odor: Low
- Scratch Resistant: Yes
- Resistance: Scratch, UV, Chemicals
- Color: Assorted Colors
- Mixing Ratio: 2/1:1
- Formula: Mekloncolormix
- Product: Ready Mixed Paint
- Color Options: Multiple
- Coating: Acrylic
- Package: Carton
- Product Type: Automotive Paint
- Indoor/outdoor: Indoor/Outdoor
- Highlight: **scratch resistant car paint,
low odor automotive paint,
refinish car paint black gold gray**

Product Description

Specific product features

High cost-effectiveness

Price advantage: As a factory supplied product, it eliminates the need for layer by layer markup in intermediate links and provides consumers with high-quality repair paint at a more affordable price. Compared to repair paints of the same type and quality on the market, it can save significant costs for repair shops and car owners.

Balancing performance and price: While ensuring excellent repair results and durability, effective cost control has been achieved, allowing customers to receive high-quality car repair services without having to spend high costs.

Durable and long-lasting

Strong weather resistance: able to resist the effects of various harsh weather conditions, such as long-term exposure to sunlight, its UV resistance can effectively prevent paint fading and powdering; In the cold winter and hot summer, the paint surface will not crack or peel off due to temperature changes, maintaining good appearance and performance for a long time.

Good chemical stability: It has strong resistance to acid rain, bird droppings, tree sap, and other common corrosive substances that will not easily corrode the paint surface, ensuring the long-term durability of the repaired area.

Scratch resistant

High hardness: The paint film has a high hardness and can effectively resist scratches that may be encountered in daily use, such as collisions with other vehicles or objects, scratches from sharp objects such as keys, etc., reducing the risk of paint damage.

Good wear resistance: During long-term friction processes, such as sponge wiping during car washing, friction between clothing and the car body, the paint surface can still remain smooth and flat, less prone to wear marks, and maintain the beauty of the car.

Black Gold Gray Unique Effect

Unique color: Black gold gray is a classic and fashionable color combination that combines the calmness and mystery of black with the nobility and luster of gold, while incorporating the neutrality and softness of gray, adding unique charm and personality to cars.

Excellent visual effect: This color presents rich layering and gloss changes under different lighting conditions, making the car look more three-dimensional and dynamic, and enhancing the overall level of the vehicle.

Applicable scenarios

Automobile repair shop: used for partial repair and whole vehicle spraying of various vehicle models, providing high-quality repair effects for both small cars and large commercial vehicles.

Car Beauty Shop: When renovating a car, this repair paint can provide perfect color restoration and appearance enhancement for the vehicle, meeting customers' requirements for car aesthetics.

Car owner DIY: For car owners with certain knowledge and skills in car maintenance, this repair paint can also be used to repair small scratches and bumps on the vehicle by themselves, saving costs and quickly solving problems.

Construction advantages

Easy to apply: It has good leveling and atomization properties, and is compatible with various spray guns. Construction personnel can easily master spraying techniques, achieve uniform and smooth coating effects, and reduce construction difficulty and rework rate.

Fast drying: It can dry in a shorter time, improve construction efficiency, reduce vehicle waiting time, and allow car owners to use their vehicles faster.
