

Wear Resistant Gray Metal Car Spray Paint With High Performance Matching The Original Factory Color

Our Product Introduction

for more products please visit us on refinishcarpaint.com

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: BMW
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Voc Content: Low
- Easy To Clean: Yes
- Primer Required: Yes
- Odor: Low
- Resistance: Various Resistance
- Water Resistance: Yes
- Product Usage: Exterior Car Cleaning
- Compatibility: Suitable For All Types Of Cars
- Form: Liquid
- Voc: Low
- High Light: Ready Mixed Car Paint
- Suitable For: Automotive Use
- Highlight: **wear resistant car spray paint,
gray metal car paint,
high performance factory color paint**

Product Description

Product Introduction

Product Overview

This is a high-performance wear-resistant gray metal car spray paint designed specifically for car repair, modification, and maintenance. It can accurately match the original car color and provide long-lasting and beautiful coating protection for the vehicle.

Core Features

Excellent wear resistance

This spray paint has excellent wear resistance and can effectively resist the wear and tear of the car paint caused by various factors in daily use. Whether it is friction with dust and sand particles in the air during vehicle operation, or slight collisions and scratches with other objects when parked, it can easily handle and maintain the integrity and glossiness of the paint surface for a long time, reducing paint damage and fading caused by wear and tear.

After professional testing, its wear resistance performance far exceeds that of ordinary car paint in simulating normal usage environments, providing vehicles with a longer service life.

Grey metallic texture

The unique gray metal formula gives the spray paint a charming metallic texture after application. This gray tone is not only classic and versatile, but also suitable for various styles of cars. The addition of metal particles allows the paint surface to reflect a unique luster at different light angles, increasing the vehicle's three-dimensional and luxurious feel.

Compared with ordinary gray spray paint, metallic texture can give vehicles a more modern and fashionable appearance, enhancing the overall level of the vehicle.

High performance matching with original factory colors

After precise color matching and research and development, this spray paint can highly match the original car color. Whether it's new car repainting or old car refurbishment, it can achieve a nearly colorless repair effect, making the repaired area blend seamlessly with the original car paint surface without any obvious repair marks.

For various brands and models of cars, precise colors can be found to meet the personalized needs of different customers.

High durability

Has good weather resistance and can resist the erosion of natural factors such as ultraviolet radiation, acid rain, and oxidation. Long term exposure to sunlight makes the paint surface less prone to fading or yellowing, maintaining a bright gray metallic color; In adverse weather conditions, such as acid rain areas, it can effectively prevent paint corrosion and extend the service life of paint.

At the same time, the spray paint also has a certain degree of chemical corrosion resistance, which can resist chemical substances that may come into contact with daily driving, such as bird droppings, tree sap, cleaning agents, etc., protecting the paint surface from damage.
