## Product Description

### Product Introduction

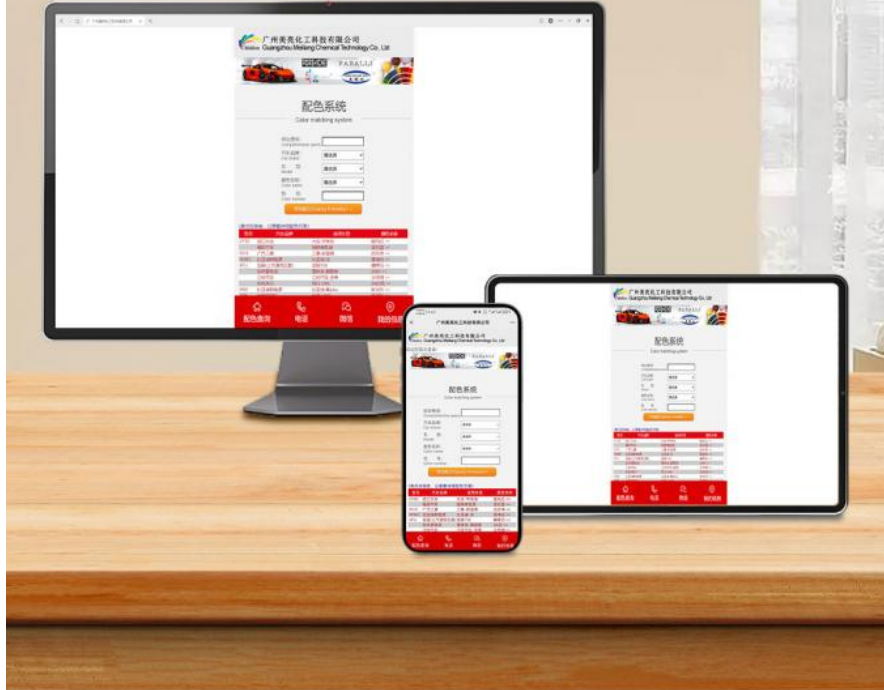

This high gloss and high-performance scratch resistant blue black car repair paint adopts a unique blue black color scheme, and the paint surface shines like a mirror, instantly enhancing the level of the car, low-key luxury and texture! It has high hardness and strong wear resistance, easily resisting key scratches and daily bumps, and maintaining the paint surface intact as new for a long time; Quick drying after construction greatly improves painting efficiency, suitable for quick repair and batch processing. Perfectly matched with the original blue black paint, repaired without color difference, professional level coverage easily restores the true color of the car; At the same time, it has long-lasting protection against UV rays and acid rain, and will not fade after long-term exposure to sunlight. Even in harsh weather, it can protect the paint surface for a long time, making it an ideal choice for luxury car repair and daily refurbishment!

Term	Detail
<b>Product Name</b>	High gloss and high-performance scratch resistant blue black automotive repair paint
<b>Product Type</b>	Automotive repair paint
<b>Colour</b>	Blue black, combining the depth of blue with the stability of black, unique and attractive, can add personality and charm to vehicles
<b>Gloss</b>	High gloss, strong reflective ability of paint surface, presenting a bright and dazzling visual effect, making the car appearance more beautiful and eye-catching, and enhancing the overall level of the vehicle
<b>Performance Characteristics</b>	Adopting advanced formulas and processes, it has excellent comprehensive performance. Has excellent adhesion, can firmly adhere to the surface of the car, and is not easily detached; Good weather resistance, able to resist the influence of harsh environmental factors such as ultraviolet radiation, high temperature, and low temperature, and maintain stable color and performance for a long time; Strong chemical corrosion resistance, able to resist the erosion of acid rain, bird droppings, tree sap and other substances
<b>Performance Characteristics</b>	The paint film has high hardness and wear resistance, which can effectively resist scratches that may be encountered in daily use, such as collisions with other vehicles or objects, scratches from sharp objects such as keys, etc., reducing the risk of paint damage and maintaining the integrity and aesthetics of the car's appearance
<b>Applicable Scenarios</b>	Suitable for repairing blue and black areas in various cars, whether it's sedans, SUVs, or commercial vehicles, it can provide high-quality repair results. Can be used to repair blue and black paint damage caused by collisions, scratches, etc., and can also be used for partial refurbishment of cars to restore the vehicle to its original condition
<b>Construction Advantages</b>	It has good construction performance, moderate fluidity, easy spraying, and can form a uniform and smooth paint film. The drying speed is fast, which can improve construction efficiency and reduce construction time. Good compatibility with various substrates and bottom coatings, ensuring good bonding effect

Term	Detail
Quality Assurance	After strict quality testing, it meets relevant industry standards and specifications to ensure stable and reliable product quality. Provide a certain quality assurance period, during which corresponding after-sales service can be provided in case of quality problems
