

Cool Red Silver Metal Car Paint Dual Tone Factory Direct Supply High-Performance

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Honda
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Product Type: Car Paint
- Weather Resistance: Yes
- Usage: For Repairing And Refinishing Car Paint
- Sheen: High Gloss
- Scratch Resistance: High
- Heat Resistance: Yes
- Suitable For: Automotive Use
- Dryingtime: 20 Minutes
- Voc: Low
- Compatibility: Suitable For All Types Of Vehicles
- Voc Level: Varies
- Water Resistant: Yes
- Highlight: dual tone car paint, red silver metal car paint, high-performance refinish paint

Product Description

Product Introduction

700 Red Silver Car Spray Paint is a cool metallic paint designed specifically for car owners who pursue individuality and high performance. The unique "red silver dual tone" is the core highlight - red conveys passion and vitality, while silver adds technology and a cool texture. The two create a dynamic color collision effect through the delicate reflection of metal particles, allowing the vehicle to present a rich visual impact in the sunlight and easily stand out from conventional traffic.

This spray paint adopts a high-purity metal particle formula, which not only enhances the three-dimensional luster of the red and silver colors (showing dynamic flickering when the light angle changes), but also endows the paint surface with excellent physical properties: super strong adhesion ensures that the coating is firmly attached to the body of the car and will not peel off after long-term use; Weather resistance to UV rays, acid rain, and bird droppings corrosion, maintaining a distinct contrast and luster of red and silver even after years of outdoor exposure; Wear resistant and scratch resistant properties resist daily car wash friction, minor collision scratches, and reduce the risk of paint damage; Simultaneously balancing high glossiness and low VOC environmental standards, while also considering aesthetics and health.

As a factory supplied product, 3.700 red and silver spray paint eliminates intermediate costs, providing more competitive prices and stable supply capabilities. It can also adjust the red and silver ratio according to customer needs (such as a more red toned sportiness or a more silver toned technology), and accurately match the original color or customized solution through professional color adjustment services. Whether it's the performance modification of sports sedans, the trendy upgrade of personalized SUVs, or the partial restoration of the original factory texture, this spray paint can become the ideal choice for car owners with high performance and unique aesthetics!

Term	Detail
Type	Metallic texture car spray paint
Supply mode	Factory Direct Supply
Core Features	Factory direct supply advantages: no intermediaries in source production, better prices, stable supply, and support for customized needs (such as adjusting the red silver ratio). Strong adhesion: firmly attached to the vehicle body, resistant to detachment and peeling, and maintains the integrity of the coating for a long time. Good weather resistance: resistant to UV rays, acid rain/bird droppings corrosion, long-term outdoor use without fading or powdering. Wear resistant and scratch resistant: The paint film has high hardness and is resistant to daily friction, slight collisions, and scratches, reducing the risk of damage. High glossiness: The mirror reflection effect enhances the visual brightness and luxury of the entire vehicle.
Applicable scenarios	Sports car modification, personalized customization, partial repair of new cars, refurbishment of old cars
Construction adaptability	Compatible with multiple spray guns and construction processes, with excellent leveling performance and easy to achieve uniform spraying; Support single-layer/multi-layer spraying to adjust glossiness and color density
Technical support	Provide precise color matching services (based on original factory color codes or customized customer requirements), with construction guidelines and after-sales support provided
