

High Gloss Heat-Resistant And Weather Resistant Classic Red Car Paint

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meklon
- Certification: ISO,MSDS,SGS
- Model Number: Car Charm
- Minimum Order Quantity: 50L
- Price: 2.73USD/L-5.56USD/L
- Packaging Details: Box/Carton
- Delivery Time: 10-15 Work Day
- Payment Terms: T/T
- Supply Ability: 500L per day

Product Specification

- Voc: Low VOC
- Series: CarCharm Series
- Finish: Gloss
- Surface Compatibility: Metal, Plastic, And Fiberglass
- Uv Protection: Yes
- Uv Resistant: Yes
- Top Coat Required: Yes
- Scratch Resistance: High
- Fade Resistance: Yes
- Chip Resistant: Yes
- Heat Resistance: Yes
- Odor: Low
- Highlight: high gloss car paint, heat resistant car paint, weather resistant red car paint

Product Description

Excellent honors exported overseas

As a benchmark brand in the global automotive repair paint and industrial coatings field, Meklon has relied on half a century of technological accumulation and quality assurance. Its products are exported to over 60 countries and regions including Europe, America, Asia, and the Middle East, becoming the preferred partner for many international car companies, repair shops, and modification markets. Our overseas honor and trust stem from the following core advantages:

International Certification Endorsement: Certified to international standards such as ISO 9001 (Quality Management System) and ISO 14001 (Environmental Management System).

Century old car company trust: Long term provision of original factory level repair paint and customized color services for European luxury brands (such as Mercedes Benz, BMW), North American pickup truck manufacturers (such as Ford, General Motors), and mainstream Japanese and Korean car companies (such as Toyota, Honda), with products covering 4S stores and authorized repair networks worldwide.

High repurchase rate in the market: In the high-end modification market in Europe and America, Meklon has become the "designated paint" for racing clubs and classic car repair institutions with a reputation of "color reproduction over 99.9%" and "weather resistance over 10 years". The repurchase rate of overseas customers has exceeded 85% for five consecutive years.

Powerful global color matching system

1. Accurately match each car

Meklon's "8000+OEM color library+intelligent color matching technology" is a recognized "color authority" in the industry, covering the original and popular color needs of over 98% of car models worldwide, redefining the color standards for automotive repair and customization.

2. Massive color library coverage

8000+formula database: including original color codes of all car series in Europe (German/French), America (American muscle cars), Asia (Japanese/Korean) and other regions (such as Porsche 911 Classic Red, Tesla Cybertruck Matte Grey, Honda Civic Sport Blue), as well as global popular color trend colors (such as 2024 popular metal silver, retro green).

Special material adaptation: Supports all types of metallic paint, pearl paint, plain paint, clear paint, etc., accurately matching the texture requirements of different car paints (such as high gloss/matte/pearl effect).

3. Cutting edge color matching technology

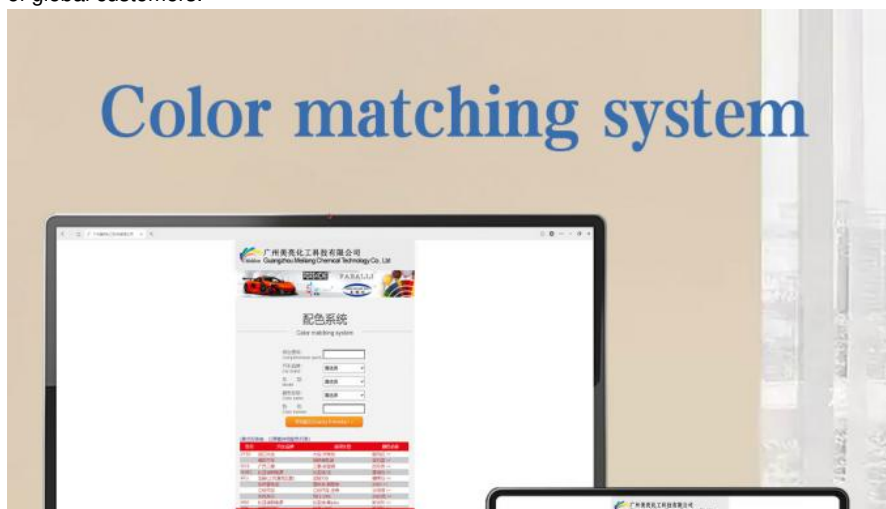

The world's leading spectrophotometer: using multispectral analysis+AI algorithm, it scans the original car paint surface to generate accurate formula within 3 seconds, with color difference value controlled within $\Delta E \leq 0.5$ (industry-leading accuracy), ensuring "seamless fusion" after repair.

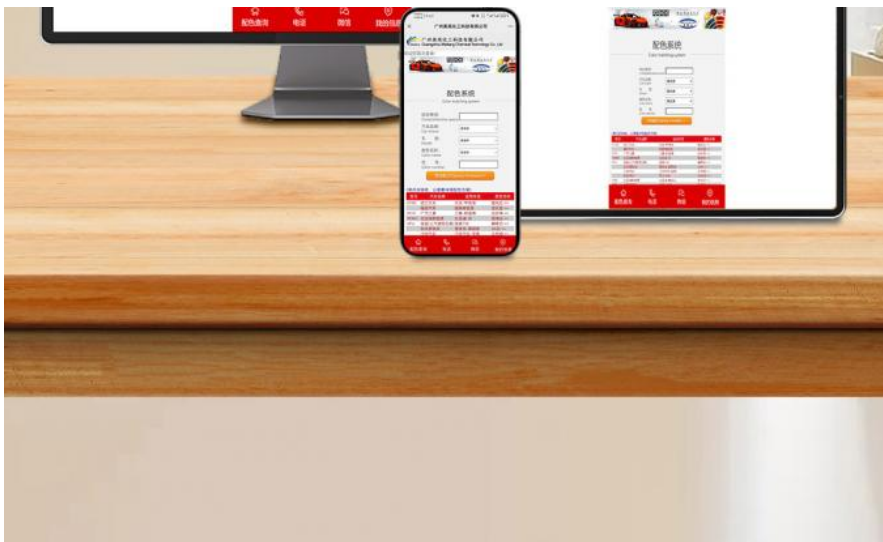

Dynamic Color Database Update: Investing over a million dollars annually for global new car color code collection and analysis, synchronizing the latest factory colors released by car companies in real-time (such as quarterly limited edition model colors), ensuring that the color matching system always leads the market.

4. Customized service capability

Personalized color matching: Support customers to customize exclusive colors based on PANTONE color cards, RAL color cards, or physical samples (such as brand logo colors, modified car theme colors), and provide small batch trial spraying services to ensure satisfactory results.

Multi scenario adaptation: Adjust the formula for different climate conditions (such as tropical high UV areas and extremely cold environments) to ensure that the color does not fade or crack in extreme environments, meeting the differentiated needs of global customers.
