

## Multi functional high-temperature and high viscosity adhesive tape for automotive spray painting 008, 009

Our Product Introduction

for more products please visit us on [refinishcarpaint.com](http://refinishcarpaint.com)

### Basic Information

- Place of Origin: GUANGDONG CHINA
- Brand Name: Meklon
- Certification: ISO,SGS,MSDS
- Model Number: 008 009
- Minimum Order Quantity: 1000Boxes
- Price: USD0.06-0.10/Roll
- Packaging Details: 18\*40CM/18\*50CM,24\*40CM/24\*50CM
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 500000Boxes/Month

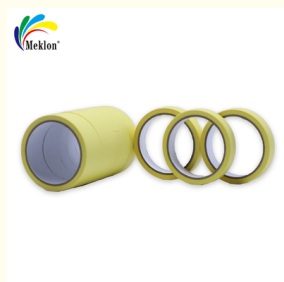

### Product Specification

- Professional Quality: Provides Professional Quality Finish
- Color Options: Yellow, White
- Type: Automotive Paint Tape
- Special Features: Scratch-free And Streak-free Formula
- Coverage: High
- Waterproof: Yes
- Suitable Surfaces: Metal, Plastic, Fiberglass
- PRODUCT MODEL: 008 009

## Product Description

**Meklon's Multi functional high-temperature and high viscosity adhesive tape for automotive spray painting 008, 009 is a top-tier choice for automotive painting tasks.**

### **Model 008 - 100 High - temperature Adhesive Tape**

This tape is designed to withstand high temperatures of up to 100 , making it ideal for the heat - generating processes involved in automotive spray painting. It comes in two convenient roll sizes:

**The 24 \* 40M roll** offering a great balance between length and cost - effectiveness for smaller - scale or less demanding projects.

**The 24 \* 50M roll** provides an extended length, which is perfect for larger automotive painting jobs where more tape is needed to cover extensive areas.

### **Model 009 - 100 High - temperature Adhesive Tape**

Also capable of withstanding 100 temperatures, Model 009 is another excellent option. It has the following roll - size options and prices:

**The 18 \* 40M.** Its relatively smaller width might be suitable for more precise painting tasks or areas where less tape width is sufficient.

**The 18 \* 50M** giving you more tape length while still being an affordable choice for automotive painting applications.

Both models feature high viscosity, ensuring strong adhesion to various automotive surfaces during the spray - painting process. They effectively mask off areas that need to be protected from paint, providing clean and precise painting results. Whether you are a professional automotive painter or a DIY enthusiast, Meklon's 008 and 009 high - temperature adhesive tapes are reliable and cost - efficient solutions for your automotive spray - painting needs.
