Product Description

Pre mixed cup and paint mixing cup for automotive repair paint: hot selling and cost-effective automotive repair products

Product Overview

[This product is a paint mixing cup designed specifically for the automotive repair industry, and can also be used as a pre mixed cup for automotive repair paint. It offers multiple capacity specifications, including 1L, 2L, 0.2L, 0.3L, and 0.5L, to meet the needs of automotive maintenance and painting operations of different scales.](#)

Product Features

Multiple capacity options

We offer a variety of capacity specifications ranging from 0.2L to 2L, making it easy to find suitable paint mixing cups for small area repairs or large area body painting, effectively avoiding material waste.

High Performance-Price Ratio

The price of each box is only 130 yuan, including paint mixing cups of different capacities. The price is affordable, making it an ideal choice for car repair shops and individual maintenance personnel to control costs and improve economic efficiency.

Practical and Convenient

The design conforms to ergonomics and is easy to hold and operate. At the same time, the cup lid design can effectively prevent paint splashing and volatilization, maintain the mixing ratio and working performance of the paint, and improve work efficiency.

Application Scenarios

This paint mixing cup is mainly used for painting operations during car repair and maintenance processes. Whether it is repairing the car body or repainting the entire vehicle, it can help maintenance personnel accurately mix paint and thinner, ensuring consistency and high quality of paint spraying effect.

Summarize

Overall, this car repair paint premix cup and paint mixing cup have become popular products in the automotive repair industry due to their diverse capacity options, high cost-effectiveness, and practical convenience. It can not only meet the work needs of professional maintenance personnel, but also help control costs and improve work efficiency.
