## Product Description

### Customizable Acrylic Car Paint Directly Sold By Manufacturers

Record of positive feedback from customers after visiting the factory

We flew from Senegal to China specifically to visit the Meklon factory, and we didn't expect their technology to be so professional! The workshop is clean and tidy, the production line is fully automated, and even the color matching is precisely controlled by a spectrometer - no wonder the paint we purchased before did not fade even after being exposed to sunlight for six months in Dakar! The weather resistance test in the laboratory gives us more peace of mind, and in the future, our store's car paint will only recognize Meklon! "

——A car repair chain store owner in Dakar, Senegal (feedback after on-site inspection in 2023)

Technicians in Cote d'Ivoire have been complaining about the difficulty of the previous paint application, but Meklon's technical manager taught us on site to adjust the spraying parameters and recommended a moisture-proof formula based on our local humid climate. The factory directly arranged for the samples to be sent back for testing, and now customers are saying 'this paint surface is as shiny as a new car!' "
