Product Description

Meklon Recommends High Cost Performance African Hot Selling Acrylic Car Paint

Meklon High Cost Performance African Hot Selling Acrylic Automotive Paint - A Durable Coating Solution Designed for Tropical Markets

Meklon has launched a series of acrylic car paint products specifically developed for tropical regions, in response to the climate characteristics of high temperature, strong ultraviolet radiation, and high dust in Africa. This product, through formula innovation and process optimization, fully meets the comprehensive needs of the African market for automotive paint durability, construction adaptability, and cost control while maintaining excellent cost-effectiveness.

Core advantages of the product

Climate adaptation enhancement

The high-temperature resistant formula can withstand continuous exposure to 60 without foaming or cracking
50% increase in UV resistance index, effectively resisting color fading caused by strong light
Dustproof sand formula reduces surface static electricity, reduces dust adhesion, and facilitates cleaning

Excellent cost control

Localized production reduces tariffs and logistics costs, with prices 40% lower than European and American brands
Each liter of paint can cover 12-14 square meters, and the unit coating cost is industry-leading
Provide a 200 liter large packaging option, suitable for fleet batch painting

Special adaptation for the African market

Localization of color system
Develop high saturation formulas for dark color schemes (red, yellow, blue) that are more in line with local aesthetics
White paint with anti yellowing agent to solve the problem of discoloration in high temperature and high humidity environments
Support small batch trial orders (minimum order of 100 boxes)

Welcome to request the African real-life testing report and price list! We provide free samples and technical training support for first-time cooperative customers.
