

Refinish Car Paint professional automotive paint designed for application and excellent adhesion on various car body panels X09 Glitter Red Silver

Our Product Introduction

for more products please visit us on refinishcarpaint.com

Basic Information

- Place of Origin: CHINA
- Brand Name: Mei Guan Da
- Certification: ISO,MSDS,SGS
- Model Number: X09
- Minimum Order Quantity: 50L
- Price: 2.73USD-5.56USD
- Packaging Details: Carton, Iron canister
- Delivery Time: 7~14 working days
- Payment Terms: T/T
- Supply Ability: 500 boxes per day

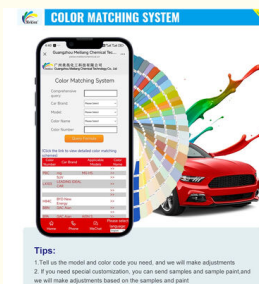

Product Specification

- Gloss Retention: High
- Basetype: Acrylic
- Manufacturer Location: China
- Dryingtime: 15-30 Minutes To Touch Dry
- Color Formula App: Meklonpaintmix
- Finish: Glossy / Matte / Satin
- Wholesale: Yes
- Covering Strength: Excellent
- Scratch Resistant: Yes
- Service: OEM/ODM
- Uv Protection: Provides Protection Against UV Rays
- Hardenerrequired: Yes / No (depending On Product)
- Type: Automotive Refinish Paint
- Highlight: **Refinish car paint glitter red silver, Professional automotive paint excellent adhesion**

Product Description

Refinish Car Paint professional automotive paint designed for application and excellent adhesion on various car body panels X09 Glitter Red Silver

Meklon Chemical's X09 Glitter Red Silver is a premium 1K acrylic metallic basecoat tinter, belonging to our full color silver metallic tinter series. Benchmarked against global industry leaders including PPG, Yatu, AkzoNobel and Sherwin-Williams, this product combines a rich, true red pigment base with evenly dispersed ultra-fine aluminum flakes to create a luminous, textured metallic finish that catches light for a premium, high-end appearance.

Formulated with 50%-80% high-purity acrylic resin and a precisely balanced solvent system, it delivers excellent aluminum flake orientation, strong adhesion to primer surfaces, and long-term weather durability. The 2%-30% pigment and aluminum flake loading ensures strong tinting power and consistent batch-to-batch color accuracy with uniform sparkle distribution. As a 1K basecoat product, it is designed to be mixed with 1K basecoat binder and top-coated with 2K clear coat for optimal performance.

Manufactured in our state-of-the-art 60,000 m² ISO-certified facility, we enforce strict quality controls at every production stage. We offer competitive factory pricing, flexible MOQs and full OEM/ODM customization services to support your brand growth. With a reliable 7-14 days delivery cycle, we are your trusted partner for automotive paint supplies worldwide.

Features & Advantages

- **Premium Metallic Sparkle Effect:** X09 Glitter Red Silver is part of our 1K color silver metallic tinter series. It features a pure vibrant red base infused with uniformly dispersed ultra-fine aluminum flakes. Under light illumination, the aluminum particles create a bright, textured metallic sparkle that adds depth and premium feel to any red finish, ideal for standard automotive refinishing and custom accent work.
- **High Solid Acrylic Formula:** Formulated with 50%-80% acrylic resin for excellent aluminum orientation, adhesion and weather durability. Pigment and aluminum flake content ranges from 2%-30% for strong tinting power and uniform sparkle distribution. Balanced solvent system (5%-15% xylene, 5%-15% PMA, 10%-25% butyl acetate) ensures excellent leveling, fast flash-off and a wide application window.
- **Manufacturer Strength:** Produced in our 60,000 m² ISO-certified factory. Stable bulk supply with guaranteed 7-14 days lead time for global orders.
- **Customization Support:** Full OEM/ODM services available for orders over 300 units, including custom labels, packaging and color matching. Full 1K color silver tinter series can be customized.
- **99.9% Color Consistency:** Precision-matched by professional tinting systems, ensuring uniform metallic sparkle and color accuracy across every batch.

Product Specifications

Paint Film Property	Scratch-resistant
HS Code	320820
Level	High
Certification	ISO4001, ISO9001, ISO16949
Substrate	Acrylic
Components	Pigment
Formation Mechanism	Non Conversion Type
Transport Package	Carton Box
Shelf life	3-5years
MOQ	50L
Carton Specification	45*33.5*13.8
Delivery	By sea

Key Performance Features

Excellent Adhesion

Ensures corrosion-resistant, long-lasting finishes on car surfaces while minimizing rework in collision repair applications.

Strong Covering Power

High-performance automotive paint with primer-ready formula achieves flawless adhesion and durability on pre-treated metal surfaces using compatible epoxy primers.

High Chroma Color

Ultra-high chroma automotive paint with Pantone®-validated color intensity delivers vibrant, fade-resistant finishes for custom cars and luxury restorations (ISO 105-A05 xenon test certified).

Manufacturer Advantages

Guangzhou Meklon Chemical Technology Co., Ltd

Guangzhou MEKLAN Chemical Technology Co., Ltd. is a leading automotive chemical manufacturer specializing in paints, primers, and additives. With over 15 years of experience, it operates a 60,000 m² facility, adhering to ISO9001 and ISO14001 standards. The company provides high-quality, low VOC products and supports distributors with color formula software, mixing machines, and training.

Global Reach: Sales network covers more more than 65 countries with over 1,500 customers in China

Industry Partnerships: Established relationships with well-known automobile manufacturers, shipbuilding, and machinery manufacturers

Professional Support: Comprehensive technical support and timely after-sales service from order placement through completion

Custom Solutions: Customized options available for special colors and effects to meet individual customer requirements

The multi-dimensional manifestation of technical professionalism

- **Resin and Curing System:** The technical team of the company has a profound understanding of the cross-linking reaction mechanism of acrylic resin and isocyanate curing agent. They can precisely control the drying speed of the paint film, as well as the balance between final hardness and flexibility. According to different climate regions, they have developed special formulations that are suitable for high humidity and heat, cold regions, and strong ultraviolet environments.
- **Color Development Capability:** Leveraging a rich color master system and a professional color matching database, the company is able to quickly match the original factory colors of various vehicle models, meeting the strict color accuracy requirements of the repair market.
- **Safety and Compliance Assurance:** All products are accurately classified in accordance with the United Nations GHS system and Chinese national standards (GB 30000 series). They come with complete safety data sheets (SDS) and compliant labels that meet the requirements of GB/T 16483 and GB 15258. During the transportation process, strict compliance with international dangerous goods regulations such as UN1263 (Class 3 Flammable Liquids) is followed. Each batch of exported products is entrusted to an authoritative institution to obtain the "Cargo Transportation Condition Appraisal Certificate" to ensure full chain safety and compliance from production to delivery.

FAQ

Q1: What are the unique color characteristics of X09 Glitter Red Silver?

A: X09 Glitter Red Silver is a 1K metallic basecoat tinter from our color silver tinter series. It has a pure vibrant red base infused with fine aluminum flakes. Under light illumination, the aluminum particles present a bright sparkling metallic effect, adding depth and texture to the red finish. It is widely used for automotive refinishing, custom paint jobs and decorative coating applications.

Q2: What is the product formula and its corresponding performance advantages?

A: This 1K tinter uses a high-solid acrylic formula with strictly controlled component ratios:

- 50%-80% acrylic resin: ensures excellent aluminum flake orientation, strong adhesion and UV weatherability, supporting long-term coating durability
- 2%-30% pigment and aluminum flakes: delivers strong tinting power and uniform sparkling effect with stable batch consistency
- 5%-15% xylene, 5%-15% PMA, 10%-25% butyl acetate: balanced solvent system ensures good leveling, fast flash-off and wide construction window

Q3: How does its quality compare to international top brands?

A: Our X09 Glitter Red Silver is strictly developed according to PPG and Yatu 1K basecoat standards. It matches their performance in metallic luster, aluminum orientation, color stability and weather resistance, offering a cost-effective alternative to imported products.
