The multi-dimensional manifestation of technical professionalism

- **Resin and Curing System:** The technical team of the company has a profound understanding of the cross-linking reaction mechanism of acrylic resin and isocyanate curing agent. They can precisely control the drying speed of the paint film, as well as the balance between final hardness and flexibility. According to different climate regions, they have developed special formulations that are suitable for high humidity and heat, cold regions, and strong ultraviolet environments.
- **Color Development Capability:** Leveraging a rich color master system and a professional color matching database, the company is able to quickly match the original factory colors of various vehicle models, meeting the strict color accuracy requirements of the repair market.
- **Safety and Compliance Assurance:** All products are accurately classified in accordance with the United Nations GHS system and Chinese national standards (GB 30000 series). They come with complete safety data sheets (SDS) and compliant labels that meet the requirements of GB/T 16483 and GB 15258. During the transportation process, strict compliance with international dangerous goods regulations such as UN1263 (Class 3 Flammable Liquids) is followed. Each batch of exported products is entrusted to an authoritative institution to obtain the "Cargo Transportation Condition Appraisal Certificate" to ensure full chain safety and compliance from production to delivery.

FAQ

Q1: What color tone does 221 Fuchsia present?

A: It is a cool blue-purple red 2K tint, darker and richer than rose red, popular for personalized car modification.

Q2: What is the product formula and its corresponding performance advantages?

A: This 1K tinter uses a high-solid acrylic formula with strictly controlled component ratios:

- 50%-80% acrylic resin: ensures excellent aluminum flake orientation, strong adhesion and UV weatherability, supporting long-term coating durability
- 2%-30% pigment and aluminum flakes: delivers strong tinting power and uniform sparkling effect with stable batch consistency
- 5%-15% xylene, 5%-15% PMA, 10%-25% butyl acetate: balanced solvent system ensures good leveling, fast flash-off and wide construction window

Q3: How does its quality compare to international top brands?

A: Our X09 Glitter Red Silver is strictly developed according to PPG and Yatu 1K basecoat standards. It matches their performance in metallic luster, aluminum orientation, color stability and weather resistance, offering a cost-effective alternative to imported products.
